7. TROUBLESHOOTING

If you encounter any issues with your Yaheetech Coffee Table, please consider the following common solutions:

- **Wobbly Table:** Ensure all screws and fasteners are tightened. Avoid overtightening to prevent damage to the engineered wood.
- **Lift Mechanism Stiffness:** If the lift-top feels stiff, ensure no obstructions are present in the mechanism. Regular light lubrication (e.g., silicone spray) on moving parts may help, but consult the manufacturer's guidelines first.
- **Difficulty with Assembly:** Double-check the instruction manual to ensure all steps were followed correctly and parts are oriented as shown. Sometimes, a small misstep can affect subsequent assembly.
- **Surface Scratches/Marks:** While the surface is scratch-resistant, minor marks can occur. Use appropriate wood polish or repair kits for touch-ups if needed.

For persistent issues, please contact customer support.
