SETUP

1. Charging the Device

Before first use, fully charge the voice recorder.

1. Connect the small end of the USB cable to the recorder's USB port.
2. Connect the standard USB end to a computer's USB port or a USB wall adapter (not included).
3. The indicator light will show charging status (e.g., solid light while charging, off when fully charged).
4. A full charge provides approximately 15 hours of continuous recording.

2. Setting the Time (Optional)

To ensure your recordings have accurate timestamps, connect the device to a computer. The device typically synchronizes its internal clock with the computer's time. Refer to the device's internal storage for a "Time Setting" file or instructions if manual adjustment is needed.

OPERATING INSTRUCTIONS

1. One-Touch Recording

The QZT Q1-16g features simple one-touch operation for recording.

1. To start recording, slide the ON/OFF switch to the "ON" or "Record" position. The indicator light will flash briefly and then turn off, indicating recording has started discreetly.
2. To stop recording and save the file, slide the ON/OFF switch to the "OFF" or "Save" position. The indicator light will

flash briefly, and the recording will be saved automatically.

2. Voice Activated Recording (VOS)

The VOS function allows the recorder to start recording automatically when sound is detected (above 50dB) and pause when silence occurs, saving storage space.

1. To activate VOS mode, ensure the device is off.
2. Slide the ON/OFF switch to the "ON" position. The device will enter VOS mode automatically if enabled. (Specific steps to enable/disable VOS might be in a configuration file on the device when connected to a PC. Please check the device's root directory for a settings file if VOS doesn't activate by default.)
3. Recording will begin when sound is detected and pause when sound drops below the threshold.
4. To stop VOS recording and save, slide the ON/OFF switch to the "OFF" position.

3. Playback and File Management (OTG Compatible)

You can manage and play back your recordings by connecting the device to a computer or an OTG-compatible Android smartphone.

1. **Connect to PC:** Connect the recorder to your computer using the USB cable. It will appear as a removable disk. Open the disk to access your recording files (usually in WAV or MP3 format).
2. **Connect to Android Phone (OTG):** Use an OTG adapter (not included) to connect the recorder to an OTG-compatible Android smartphone. The phone will recognize the recorder as external storage, allowing you to play, copy, or delete files using a file manager app.
