Lavazza LB 400

Lavazza Expert Classy Plus LB 400 All-In-One Coffee Machine

Model: LB 400 | Brand: Lavazza

[Instructions](#) [Maintenance](#) [Introduction](#) [Setup](#) [Operating](#) [Specifications](#) [Warranty & Support](#)

1. INTRODUCTION

The Lavazza Expert Classy Plus LB 400 is an all-in-one coffee machine designed for convenience and versatility. It is capable of brewing a variety of coffee and milk-based beverages using Lavazza Expert Capsules. This machine is suitable for small offices, conference rooms, or home use, offering espresso, 8 oz. coffee, and fresh milk-based drinks.

Key Features:

- First ALL-IN-ONE Espresso and Coffee Brewer Machine.
- Able to brew six selections of beverages: Espresso, Lungo, 8 oz. Coffee, Macchiato, Cappuccino, and Latte.
- Works exclusively with Lavazza Expert Capsules.
- Includes a milk frother vessel for fresh milk-based beverages.

2. SETUP

1. **Unpacking:** Carefully remove all components from the packaging. Ensure all parts, including the machine, milk frother vessel, and any included capsules, are present.
2. **Placement:** Place the machine on a stable, flat surface near a power outlet. Ensure adequate space around the machine for ventilation and access to the water tank and capsule loading area.
3. **Water Tank:**

Figure 2: The removable water tank located at the side of the machine.

Remove the water tank from the back of the machine. Rinse it thoroughly with fresh water. Fill the tank with fresh, potable water up to the 'MAX' level indicated. Reinsert the water tank securely into its position.

4. Initial Rinse Cycle: Before first use, perform an initial rinse cycle.

- Place an empty mug or container under the coffee dispenser.
- Power on the machine by pressing the ON/OFF button. The machine will blink while warming up.
- Once the machine stops blinking and the lights are steady, it is ready.
- Press the "Coffee 8 oz." button twice without inserting a capsule. This will run hot water through the system to clean it.

3. OPERATING INSTRUCTIONS

3.1. Brewing Coffee/Espresso

1. **Power On:** Ensure the machine is plugged in and the water tank is filled. Press the ON/OFF button to power on the machine. Wait for the machine to warm up (lights will stop blinking).
2. **Insert Capsule:** Lift the lever on top of the machine. Insert one Lavazza Expert Capsule into the capsule compartment. Close the lever firmly.

Figure 3: Lavazza Expert Capsules, required for use with this machine.

3. **Place Cup:** Place your desired cup under the coffee dispenser.
4. **Select Beverage:** Choose your desired beverage by pressing the corresponding button on the control panel:
 - **Espresso:** For a concentrated shot of coffee.
 - **Lungo:** For a longer espresso.
 - **Coffee 8 oz.:** For a standard 8 oz. cup of coffee.
 - **Double Shot:** Press this button first, then select Espresso or a milk-based recipe for a stronger

brew.

5. **Brewing:** The machine will begin brewing your selected beverage. Brewing will stop automatically.

3.2. Preparing Milk-Based Beverages (Macchiato, Cappuccino, Latte)

1. **Prepare Milk Frother Vessel:** Fill the included milk frother vessel with cold milk up to the desired level for your chosen beverage (Macchiato, Cappuccino, or Latte). The vessel has markings to guide you.

Figure 4: The milk frother vessel with clear markings for different milk-based drinks.

2. **Place Vessel:** Insert the milk frother vessel into the designated space under the coffee dispenser.
3. **Insert Capsule:** Lift the lever, insert a Lavazza Expert Capsule, and close the lever.
4. **Select Milk Beverage:** Press the button for Macchiato, Cappuccino, or Latte. The machine will automatically froth the milk and then dispense the coffee.

machine.

4. MAINTENANCE

4.1. Cleaning the Used Capsule Container and Drip Tray

1. **Remove Drip Tray:** The drip tray and used capsule container are integrated. Gently pull the drip tray forward to remove it from the machine.
2. **Empty Capsules:** The used capsules will be collected in a removable container within the drip tray assembly. Empty the used capsules into a waste bin.
3. **Clean Components:** Separate the drip tray and the used capsule container. Rinse both components with warm, soapy water. The drip tray and capsule container are dishwasher safe for easy cleaning.
4. **Reassemble:** Once clean and dry, reassemble the components and slide them back into the machine.

4.2. Descaling

Descaling is essential to maintain the performance and longevity of your coffee machine. The machine will indicate when descaling is needed (refer to Troubleshooting section for indicator light details).

1. **Prepare Descaling Solution:** Follow the instructions on your descaling solution product. Typically, this involves mixing the solution with water in the water tank.
2. **Run Descaling Cycle:** Refer to the full instruction manual for the specific descaling procedure for your LB 400 model. This usually involves running the solution through the machine multiple times, followed by several rinse cycles with fresh water.

5. TROUBLESHOOTING

The control panel features indicator lights to help identify common issues:

- **Empty Water Tank Indicator:** If the water tank is empty or below the minimum level, a specific indicator light (often a water drop icon) will illuminate. Refill the water tank to resolve this.
- **Used Capsule Container Full Indicator:** When the used capsule container is full, an indicator light (often a capsule icon) will turn on. Empty and clean the container as described in the Maintenance section.
- **Descaling Needed Indicator:** A specific indicator light (often with small dots or a scale icon) will illuminate when the machine requires descaling. Perform the descaling procedure as outlined in the Maintenance section.
- **Coffee Extraction Issues:** If espresso extraction is inadequate (too slow or too fast), check the following:
 - Ensure you are using Lavazza Expert Capsules.
 - The amount of espresso extracted can vary. Reprogramming the beverage selection might be necessary if you desire a different volume.
