Note: Small components like screws and nuts may be loose in the packaging. Please check thoroughly before discarding any packaging materials.

4. ASSEMBLY INSTRUCTIONS

Assembly of the deli Mesh Magazine File Holder requires careful attention to detail. While straightforward, ensuring all connections are tight is essential for stability.

1. **Identify Components:** Lay out all mesh panels, bottom supports, connecting rods, and nuts. The main side panels are typically larger, and the divider panels are smaller.
2. **Attach Side Panels:** Begin by attaching one side panel to a bottom support panel using the provided screws and nuts. Ensure the mesh is facing outwards and the bottom support is flush.
3. **Insert Dividers:** Carefully slide the divider panels into the designated slots or attach them to the bottom support and side panel using additional connecting rods/screws. Ensure they are evenly spaced to form the compartments.
4. **Secure Second Side Panel:** Attach the second side panel, aligning it with the bottom supports and divider panels. Secure all remaining connections with screws and nuts.
5. **Tighten All Connections:** Using pliers or a nut driver (not included), gently tighten all nuts to ensure the frame is rigid and stable. Avoid overtightening, which could strip the threads.

7. TROUBLESHOOTING

If you encounter any issues with your file holder, refer to the following common solutions:

- **Instability after Assembly:** If the unit feels wobbly, ensure all connecting screws and nuts are fully tightened. Uneven tightening can lead to instability. Disassemble and reassemble if necessary, ensuring all parts are correctly aligned.
- **Missing Parts:** If any parts are missing upon unboxing, carefully re-check all packaging materials. If still missing, contact customer support for assistance.
