3. Setup Guide

- Connect to TV:** Connect one end of the provided HD Cable (HDMI) to the HDMI port on the EVPAD EVBOX 5P and the other end to an available HDMI input on your television.
- Connect Power:** Insert the DC Power Cable into the power input port on the TV box. Connect the power adapter to the DC Power Cable and then plug the power plug into a wall outlet.
- Power On:** The device should power on automatically, or you may need to press the power button on the remote control or the device itself.
- Select Input:** On your television, select the correct HDMI input source that corresponds to where the EVPAD EVBOX 5P is connected.
- Initial Setup Wizard:** Follow the on-screen instructions to complete the initial setup, which typically includes selecting your preferred system language and connecting to a Wi-Fi network.

4. Operating Instructions

4.1. AI Voice Control

The EVPAD EVBOX 5P features AI voice control for convenient navigation and content search. To use this feature:

- Ensure the remote control is paired with the TV box.
- Press the dedicated microphone button on your remote control.
- Speak your command clearly into the remote. The system is designed for 360-degree voice recognition.

4.2. 6K UHD Video Playback

Experience high-clarity visuals with 6K UHD video decoding capabilities. The powerful Cortex A53 64-bit processor ensures smooth playback of ultra-high-definition content.

5. Maintenance

- Cleaning:** Use a soft, dry cloth to clean the exterior of the TV box. Avoid using liquid cleaners or abrasive materials.
- Ventilation:** Ensure the device is placed in a well-ventilated area to prevent overheating. Do not block ventilation openings.
- Software Updates:** Periodically check for and install system software updates to ensure optimal performance and security. These can usually be found in the device's settings menu.
- Protective Film:** A protective film may be present on the surface of the TV box. You may choose to remove it or leave it on based on your preference.

6. Troubleshooting

Problem	Possible Cause	Solution
No power	Power cable not connected; Power outlet not working	Ensure power cable is securely connected. Try a different power outlet.
No picture on TV	HDMI cable loose; Incorrect TV input selected	Check HDMI cable connections. Select the correct HDMI input on your TV.
Remote control not responding	Batteries low or depleted; Remote not paired	Replace remote control batteries. Refer to the device settings for remote pairing instructions.
Wi-Fi connection issues	Incorrect password; Router issues; Device too far from router	Verify Wi-Fi password. Restart your router. Move the TV box closer to the router or use an Ethernet cable.

7. Specifications
