vidaXL 146650

vidaXL Walk-in Shower Wall with ESG Glass

Model: 146650

INTRODUCTION

Thank you for purchasing the vidaXL Walk-in Shower Wall with ESG Glass. This manual provides essential information for the safe installation, operation, and maintenance of your new shower enclosure. Please read these instructions carefully before beginning installation and retain them for future reference.

SAFETY INSTRUCTIONS

Always follow basic safety precautions to reduce the risk of injury or damage. This product contains glass components which can be fragile if mishandled.

- **Professional Installation Recommended:** Due to the weight and nature of glass, professional installation is highly recommended.
- **Handle Glass with Care:** ESG (toughened safety glass) is designed to be strong, but improper handling can cause it to shatter. Always wear protective gloves and safety glasses when handling glass panels.
- **Inspect Components:** Before installation, carefully inspect all components for any damage. Do not install damaged parts.
- **Secure Mounting:** Ensure the wall structure where the shower wall will be mounted is sound and capable of supporting the weight of the unit. Use appropriate fasteners for your wall type.
- **Keep Children Away:** Keep children and pets away from the installation area to prevent accidents.
- **Use Proper Tools:** Use only the tools specified in the installation guide.

PACKAGE CONTENTS

Verify that all parts are present and undamaged before proceeding with installation. If any parts are missing or damaged, contact vidaXL customer support.

- ESG Glass Panel (with stone design)
- Aluminum Frame Profiles
- Flexible Supporting Bar
- Mounting Hardware (screws, wall plugs, seals)

SETUP AND INSTALLATION

This section outlines the general steps for installing your walk-in shower wall. Refer to the detailed diagrams and instructions provided with your specific product packaging for precise measurements and fastening methods.

1. **Prepare the Installation Area:** Ensure the shower tray or floor is level and the wall is clean and structurally sound. Mark the desired position for the wall profiles.

2. **Mount Wall Profiles:** Secure the aluminum wall profiles to the wall using appropriate screws and wall plugs. Ensure they are perfectly vertical using a spirit level.
3. **Insert Glass Panel:** Carefully lift and insert the ESG glass panel into the mounted wall profiles. Ensure the glass is seated correctly and securely.
4. **Install Supporting Bar:** Attach the flexible supporting bar from the top of the glass panel to the adjacent wall. Adjust its length to provide stability and ensure the glass panel is plumb.
5. **Seal Gaps:** Apply silicone sealant along the bottom edge of the glass panel where it meets the shower tray/floor, and along the wall profiles to ensure a watertight seal. Allow adequate drying time before use.

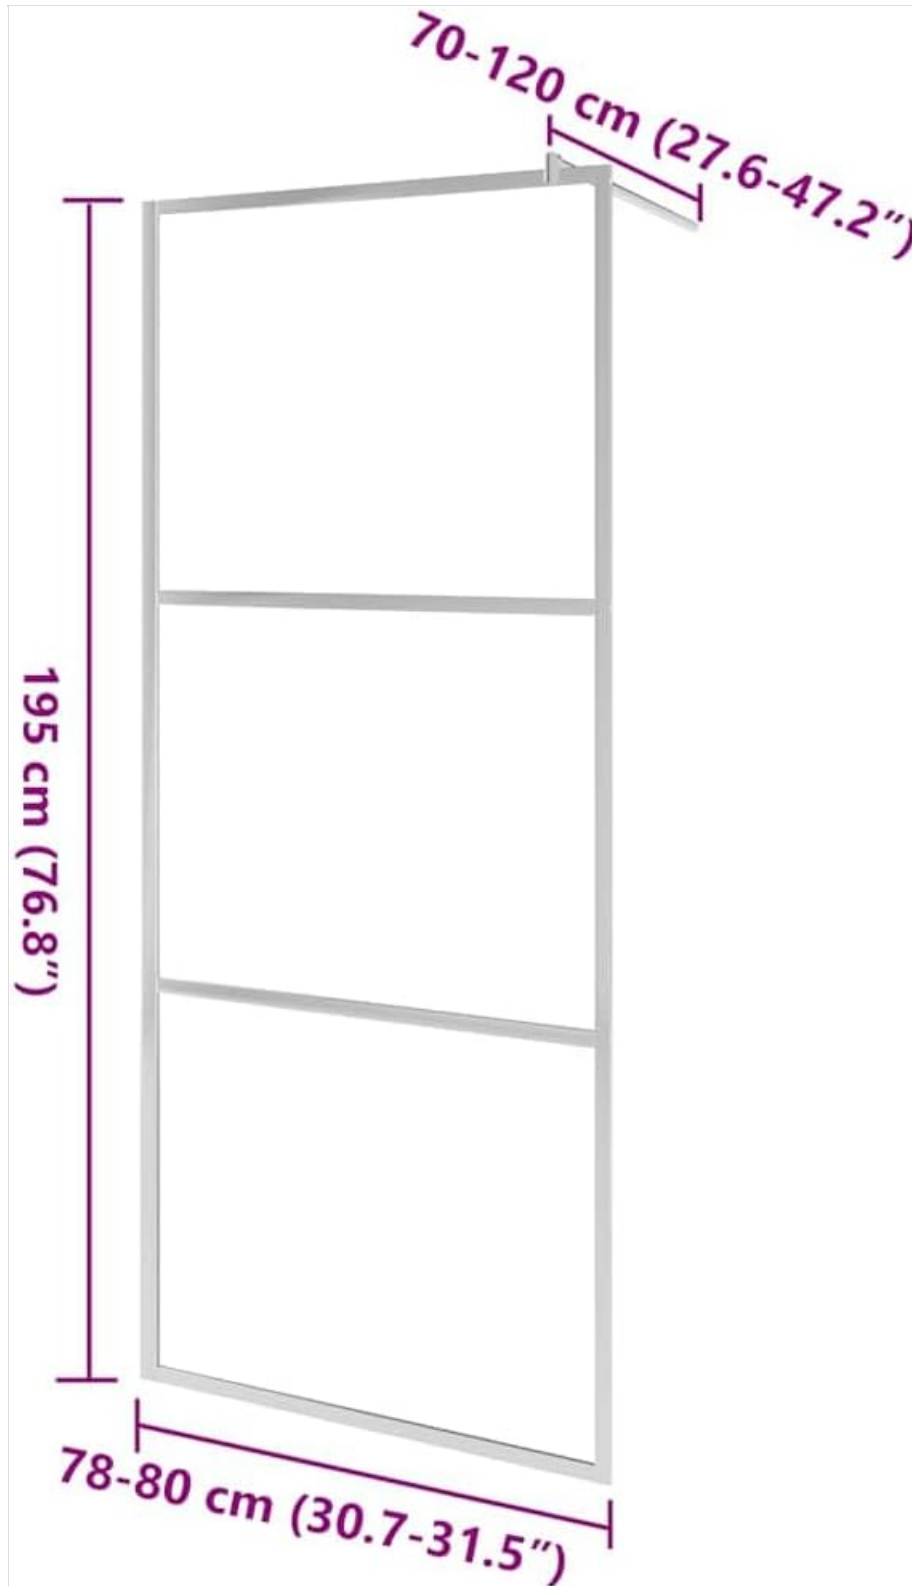

Image: Dimensional diagram of the shower wall, indicating height (195 cm / 76.8") and width (78-80 cm / 30.7-31.5"), and adjustable support bar length (70-120 cm / 27.6-47.2").

OPERATING INSTRUCTIONS

The vidaXL Walk-in Shower Wall is a fixed panel designed to create a shower enclosure. No specific operational steps are required beyond its proper installation. Ensure that the area around the shower wall is kept clear to prevent accidental impact to the glass.

MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and appearance of your shower wall.

- **Glass Cleaning:** Clean the ESG glass panel regularly with a soft cloth and a mild, non-abrasive glass cleaner. Avoid harsh chemicals, abrasive pads, or scouring agents that can scratch the glass or damage the stone design.
- **Frame Cleaning:** Wipe the aluminum frame with a damp cloth and mild soap. Dry thoroughly to prevent water spots.
- **Sealant Inspection:** Periodically inspect the silicone seals for any signs of wear, cracking, or mold. Reapply sealant as necessary to maintain a watertight enclosure.

- **Hardware Check:** Occasionally check all screws and fasteners to ensure they remain tight. Do not overtighten.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Water leakage from base	Inadequate or damaged silicone sealant.	Clean and reapply silicone sealant along the bottom edge of the glass panel and wall profiles. Ensure proper curing time.
Glass panel feels unstable	Loose wall profiles or supporting bar.	Check and tighten all mounting screws. Ensure the supporting bar is securely fastened and adjusted correctly.
Water spots or streaks on glass	Hard water deposits or improper cleaning.	Use a squeegee after each shower. Clean with a mild glass cleaner and a soft cloth. For stubborn spots, use a vinegar-based solution.

SPECIFICATIONS

Model Number	146650
Material	ESG glass, aluminum, stainless steel
Dimensions (W x H)	(30.7" - 31.5") x 76.8" (78-80 cm x 195 cm)
Glass Thickness	0.2" (5 mm)
Adjustable Supporting Bar Length	27.6" - 47.2" (70-120 cm)
Color	Silver frame, glass with stone design
Item Weight	21.59 Kilograms
Assembly Required	Yes
