Creative Hobbies WOD CLK

Creative Hobbies 9" Round Unfinished Wood Clock Face Instruction Manual

Model: WOD CLK

INTRODUCTION

This manual provides instructions for the Creative Hobbies 9-inch Round Unfinished Wood Clock Face with Laser Cut Numerals. This product is designed for craft enthusiasts and DIY projects, offering a blank canvas for creating custom clocks. It is made from high-quality poplar plywood, featuring a smooth surface and precisely cut numerals.

PRODUCT FEATURES

- **Material:** High-quality 5mm (3/16") thick poplar plywood.
- **Dimensions:** 9-inch (22.86 cm) round diameter.
- **Surface:** Sanded smooth and blank on both sides, ready for decoration.
- **Numerals:** Unique laser-cut numerals (1-12) integrated into the design.
- **Center Hole:** Pre-drilled 3/8-inch (0.95 cm) center hole for clock movement installation.

SETUP AND ASSEMBLY

1. **Prepare the Surface:** Ensure the clock face is clean and dry before applying any decorative materials. The sanded surface is ready for immediate use.
2. **Decorate (Optional):** Before installing the clock movement, decorate the clock face as desired. Refer to the 'Decoration and Customization' section for ideas.
3. **Install Clock Movement:** Insert a standard battery-operated clock movement through the pre-drilled 3/8-inch center hole from the back of the clock face. Ensure the clock movement is compatible with a 3/8-inch thick surface.
4. **Attach Hands:** Follow the instructions provided with your chosen clock movement to attach the hour, minute, and second hands to the movement shaft.
5. **Test:** Insert a battery into the clock movement and verify that the hands move correctly.

DECORATION AND CUSTOMIZATION

The unfinished poplar plywood surface provides an excellent base for various artistic applications. Consider the following methods for personalizing your clock face:

- **Painting:** Use acrylic paints, spray paints, or wood stains to color the surface.
- **Markers:** Permanent markers can be used for detailed designs or outlining the laser-cut numerals.
- **Stenciling:** Apply stencils for patterns or additional text.
- **Decoupage:** Use Mod Podge to apply paper, fabric, or other lightweight materials to the surface.
- **Embellishments:** Attach ribbons, lace, beads, or other decorative elements using appropriate adhesives.

MAINTENANCE

To ensure the longevity of your Creative Hobbies clock face, follow these simple maintenance guidelines:

- **Cleaning:** For unfinished wood, gently wipe with a dry, soft cloth to remove dust. If decorated, follow the cleaning instructions for the specific decorative materials used.
- **Storage:** Store in a dry environment away from direct sunlight and extreme temperature fluctuations to prevent warping or damage to the wood.
- **Avoid Moisture:** Do not expose the clock face to excessive moisture or humidity, as this can cause the wood to swell or warp.

TROUBLESHOOTING

This product is a simple craft blank, and most issues will relate to the clock movement chosen or the decoration process. Here are some common considerations:

- **Clock Movement Does Not Fit:** Ensure your clock movement is designed for a 3/8-inch thick surface and has a shaft diameter compatible with the 3/8-inch center hole.

- **Warping of Wood:** This can occur due to exposure to high humidity or rapid temperature changes. Store the clock face in a stable environment.
- **Uneven Decoration:** Ensure the surface is clean and dry before applying paints or other materials. Apply thin, even coats and allow adequate drying time between layers.

SPECIFICATIONS

Brand	Creative Hobbies
Model Number	WOD CLK
Material	Poplar Plywood
Shape	Round
Diameter	9 inches (22.86 cm)
Thickness	5mm (3/16 inches)
Center Hole Diameter	3/8 inches (0.95 cm)
Item Weight	3.52 ounces (0.1 Kilograms)
UPC	816682024711
