Alpine Corporation SLC131SLR-WT-2

Alpine Corporation 33" Tall Solar 3D Snowflake Garden Lawn Stakes with LED Lights

Model: SLC131SLR-WT-2

INTRODUCTION

This instruction manual provides guidance for the assembly, installation, operation, and maintenance of your Alpine Corporation Solar 3D Snowflake Garden Lawn Stakes. These stakes are designed to provide outdoor illumination using solar power, featuring 3D snowflake tops with LED lighting. Please read this manual thoroughly before use to ensure proper function and longevity of your product.

IMPORTANT SAFETY INFORMATION

- For outdoor use only.
- Keep away from flammable materials.
- Do not allow children to play on or near the display.
- Ensure stakes are securely placed in the ground to prevent tipping.

PACKAGE CONTENTS

Your package should contain the following items:

- 2 x 3D Snowflake Tops with integrated LED lights
- 2 x Solar Panel Units with attached stake poles
- 2 x Ground Stakes (lower sections)

Image: Exploded view of the solar snowflake stake components, showing the snowflake top, solar panel unit with pole, and ground stake.

SETUP INSTRUCTIONS

1. **Unpack Components:** Carefully remove all items from the packaging.
2. **Assemble the Stake:**
 - Connect the lower ground stake section to the solar panel unit's pole. Ensure a secure fit.
 - Attach the 3D snowflake top to the top of the solar panel unit's pole.

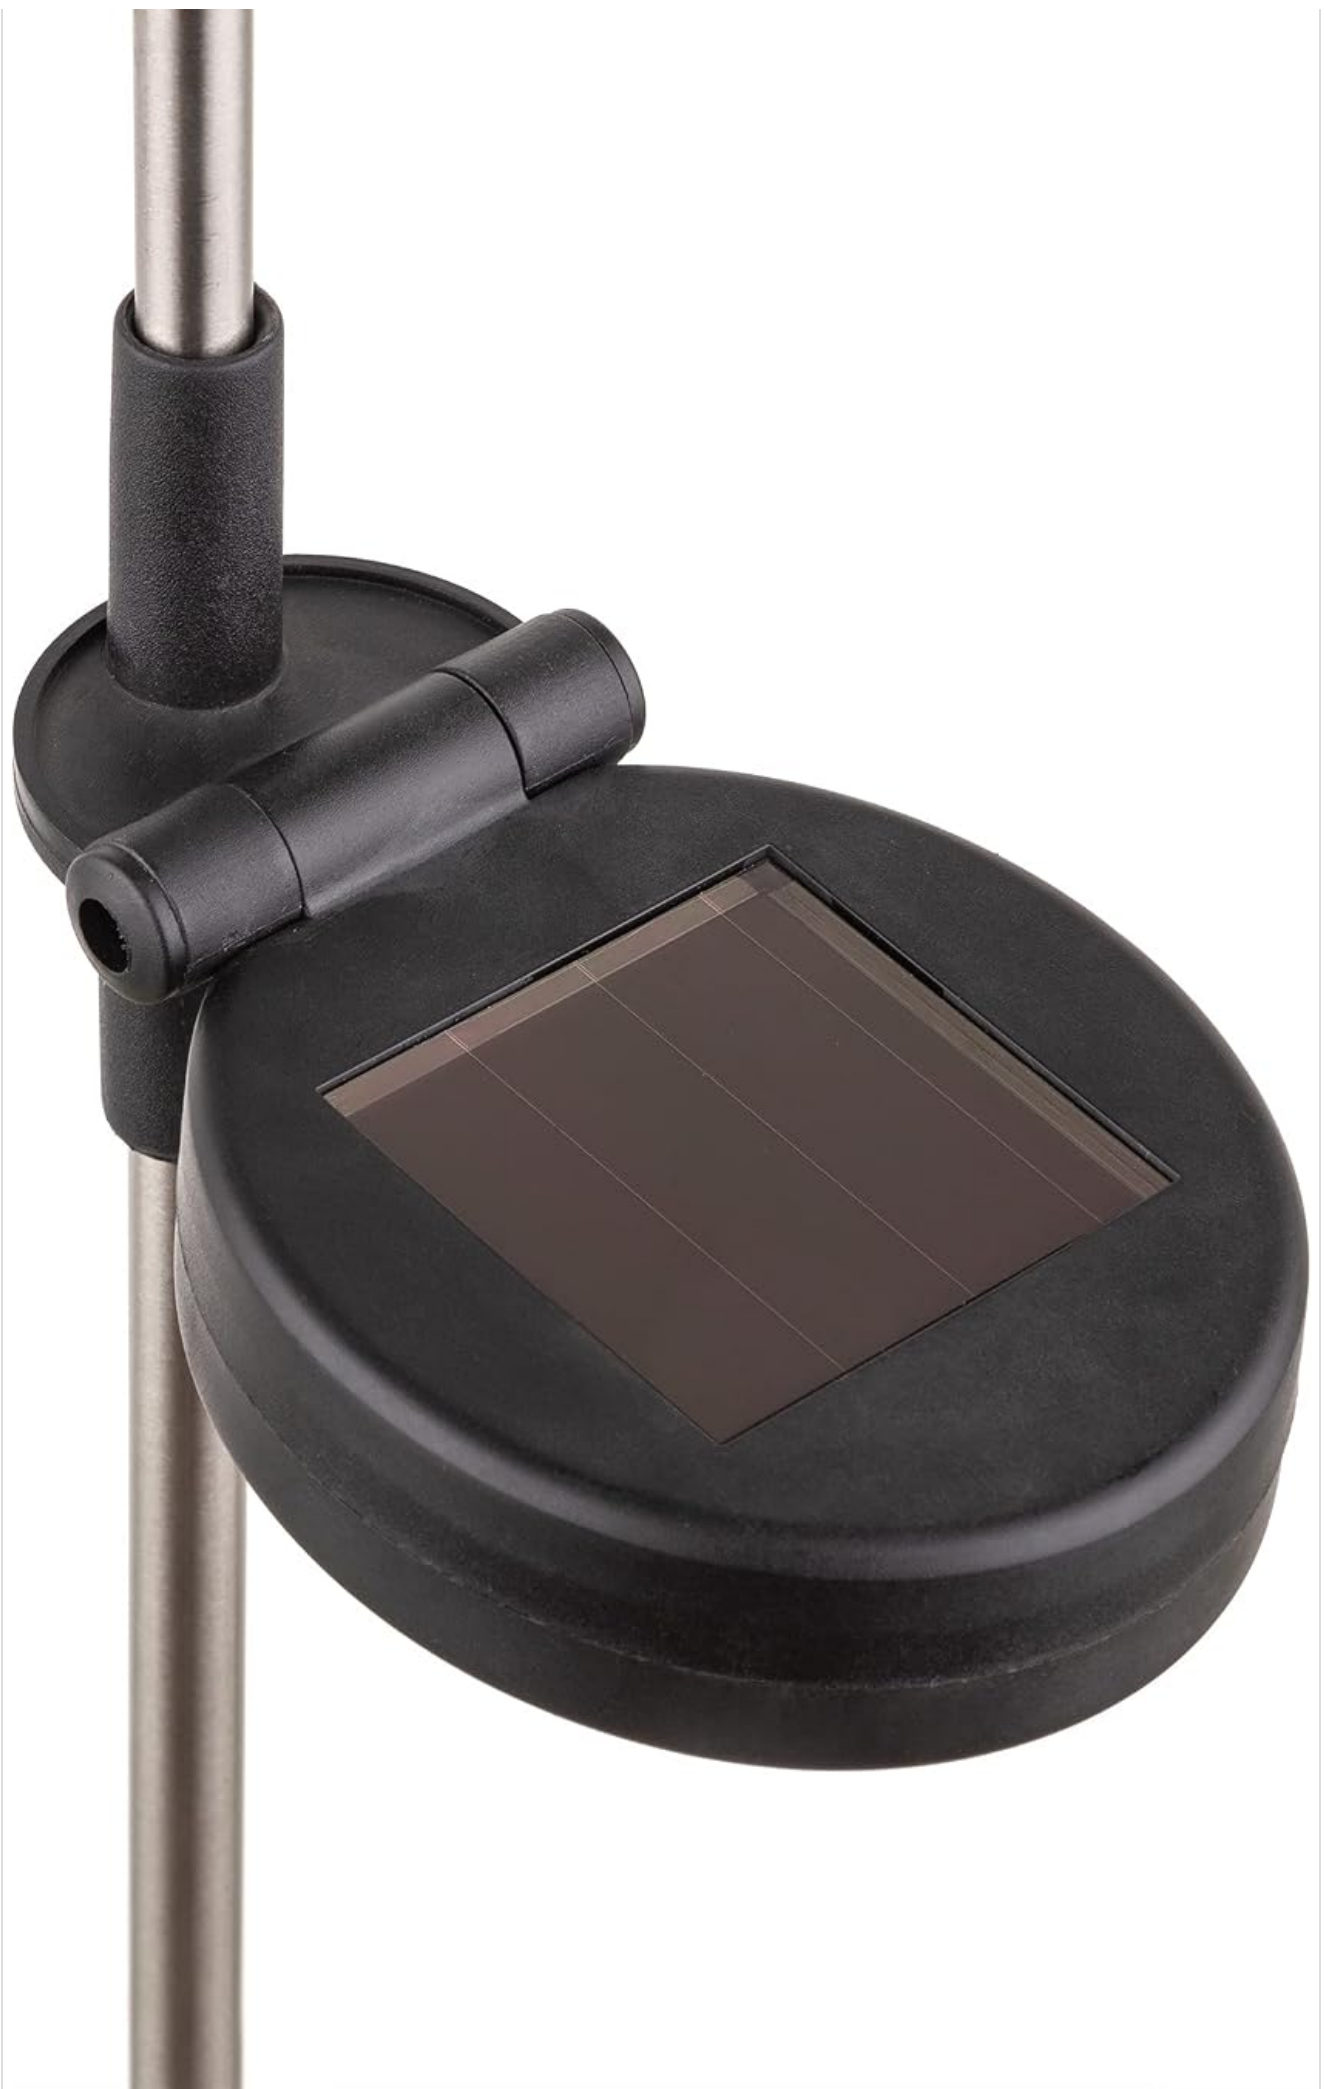

Image: An assembled solar snowflake stake, ready for installation.

3. **Select Location:** Choose an outdoor location that receives direct sunlight for at least 6-8 hours daily. This is crucial for the solar panel to charge effectively. Avoid shaded areas.
4. **Install in Ground:** Gently push the assembled stake into soft ground. Ensure the stake is firm and upright. Do not force the stake into hard or frozen ground, as this may cause damage. If the ground is too hard, pre-dig a small hole.
5. **Activate:** Locate the ON/OFF switch, usually on the underside or back of the solar panel unit. Switch it to the "ON" position. The lights will automatically turn on at dusk and off at dawn.
6. **Initial Charge:** Allow the solar stakes to charge in direct sunlight for a full day (at least 8 hours) before first use to ensure optimal performance.

Image: A close-up view of the solar panel unit, highlighting its position on the stake for maximum sun exposure.

OPERATING INSTRUCTIONS

Once properly set up and charged, your solar snowflake garden stakes will operate automatically:

- **Automatic Operation:** The integrated photocell sensor will detect ambient light levels. When it gets dark, the LED lights will automatically illuminate.
- **Daytime Charging:** During daylight hours, the solar panel will convert sunlight into electricity and store it in the internal battery. The lights will remain off during this time.
- **Illumination Duration:** On a full charge, the lights are designed to operate for up to 8 hours. Performance may vary based on sunlight exposure and battery condition.
- **Light Color:** The snowflakes emit a cool white LED light.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your solar garden stakes:

- **Clean Solar Panel:** Periodically wipe the solar panel with a soft, damp cloth to remove dust, dirt, snow, or debris. A clean panel ensures efficient charging.
- **Inspect for Damage:** Regularly check the stakes for any signs of physical damage, especially after severe weather conditions. The product is made from durable, weather-resistant materials, but extreme conditions can affect it.
- **Battery Replacement:** The rechargeable battery inside the solar unit has a limited lifespan. If the lights begin to dim or operate for shorter durations after a full day of charging, the battery may need replacement. Refer to the solar unit for battery type and replacement instructions, typically accessible by opening a small compartment.
- **Winter Storage:** If storing the stakes for an extended period, ensure they are clean and fully charged. Store them in a dry place.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lights do not turn on at night.	• ON/OFF switch is in the "OFF" position. • Insufficient sunlight for charging. • Solar panel is dirty or obstructed. • Battery is depleted or faulty.	• Ensure the switch is in the "ON" position. • Relocate the stake to an area with direct sunlight for 6-8 hours daily. • Clean the solar panel surface. • Allow a full day of charging. If problem persists, consider replacing the battery.
Lights stay on for a short duration.	• Insufficient charge due to limited sunlight. • Battery capacity has decreased over time.	• Ensure optimal solar panel exposure. • Replace the rechargeable battery.
Snowflake top or stake is loose/broken.	• Impact or stress during installation/use. • Material fatigue.	• Handle with care during installation, especially in hard ground. • If parts are detachable, attempt to re-secure. For significant damage, replacement may be necessary.

SPECIFICATIONS

Feature	Detail
Model Number	SLC131SLR-WT-2
Brand	Alpine Corporation

Feature	Detail
Dimensions (L x W x H)	5" x 3" x 33" (each stake)
Material	Plastic, Stainless Steel
Light Type	LED
Light Color	Cool White
Power Source	Solar (Battery Powered)
Operating Time (Full Charge)	Up to 8 hours
Number of Items	2
Recommended Use	Outdoor
GTIN (UPC)	821559756961

WARRANTY AND SUPPORT

This product is covered by a **1-year manufacturer's warranty**. For warranty claims, technical support, or inquiries regarding your Alpine Corporation Solar 3D Snowflake Garden Lawn Stakes, please contact Alpine Corporation customer service directly. Keep your proof of purchase for warranty validation.
