WiMiUS Q1

WiMiUS Q1 Mini Android Projector User Manual

MODEL: Q1

The compact WiMiUS Q1 Mini Android Projector, designed for portability and powerful projection.

1. Introduction

Thank you for choosing the WiMiUS Q1 Mini Android Projector. This manual provides essential information for setting up,

operating, and maintaining your projector to ensure optimal performance and longevity. Please read this manual thoroughly before using the product.

2. Package Contents

Before proceeding with the setup, please verify that all items listed below are included in your package:

- WiMiUS Q1 Mini Projector
- Remote Control
- HDMI Cable
- Power Cable
- Storage Bag
- User Manual (this document)

Packing List

All components included in the WiMiUS Q1 projector package.

3. Setup Guide

3.1 Placement

Place the projector on a stable, flat surface. Ensure there are no obstructions blocking the projection lens or the

ventilation vents. For optimal image quality, project onto a smooth, light-colored wall or a dedicated projector screen.

3.2 Power Connection

Connect the power cable to the projector's power input port and then plug it into a power outlet.

3.3 Initial Power On

Press the power button on the projector or the remote control to turn on the device. The projector will initiate its startup sequence.

3.4 Focus and Keystone Correction

The WiMiUS Q1 features an autofocus sensor that automatically measures the distance to the screen and adjusts the focus. This allows for immediate projection without manual adjustment. For keystone correction, the projector is equipped with a 4D keystone correction function, enabling it to correct image distortion even when projected from an oblique angle.

The WiMiUS Q1's unique off-axis projection function allows for flexible placement.

4. Operating Instructions

4.1 Android 9.0 System and Apps

The projector is equipped with Android 9.0, allowing direct access to over 5,000 apps like Netflix, Hulu, and YouTube without external devices. Navigate the interface using the remote control. The remote control functions best when the USB hub is plugged in.

The Android TV system allows access to a wide range of streaming applications.

4.2 Connectivity (Wi-Fi & Bluetooth)

Connect to your home network via 5G Wi-Fi for seamless streaming. The projector also supports Bluetooth connectivity for external audio devices. Note that Bluetooth speaker functionality is primarily for apps within the projector's system; direct connection with external devices like iPhones may not support Bluetooth audio output from the projector.

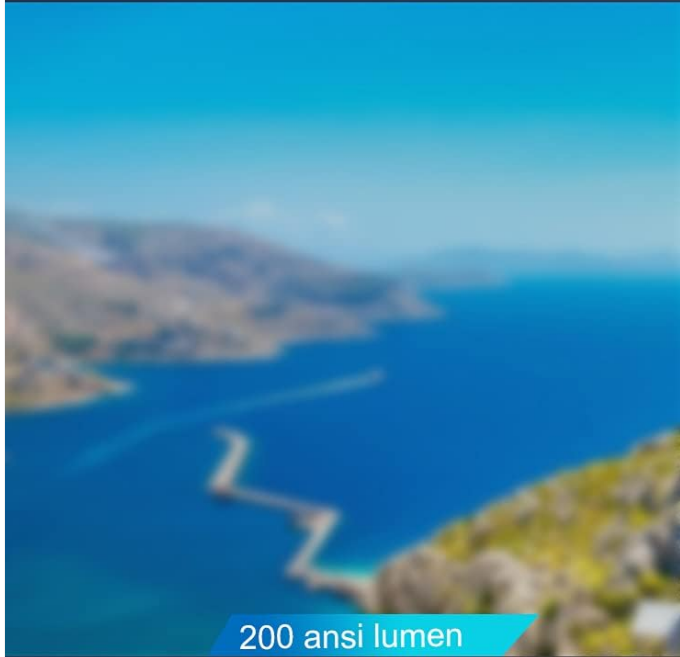

The projector offers convenient Bluetooth and Wi-Fi connectivity for various uses.

4.3 Image Quality and Brightness

The Q1 projector delivers native 1080P Full HD resolution with 4K support and 700 ANSI lumens brightness. This ensures vivid images and high contrast, even in environments with some ambient light. The DLP projection technology provides excellent color reproducibility.

Brighter and Clearer

200 ansi lumen

700 ansi lumen

5000:1

Other 1080P Supported

15000:1

Q1 Native 1080P

Experience brighter and clearer images with the Q1's advanced projection technology.

4.4 Usage Scenarios

The WiMiUS Q1 is versatile for various applications, including home theater, gaming, outdoor movies, and small conference presentations.

Small Conference Presentation

The projector is suitable for a variety of entertainment and professional settings.

5. Maintenance

5.1 Cleaning

Regularly clean the projector lens with a soft, lint-free cloth. For the exterior, use a dry or slightly damp cloth. Avoid using abrasive cleaners or solvents.

5.2 Storage

When not in use for extended periods, store the projector in its original packaging or a protective bag in a cool, dry place away from direct sunlight and extreme temperatures.

5.3 Software Updates

Periodically check for software updates to ensure optimal performance and access to new features. However, some users

have reported that updating Google services might slow down the system. Exercise caution and research before performing major system updates.

6. Troubleshooting

6.1 No Image / Blurry Image

- Ensure the projector is powered on and connected correctly.
- Verify the input source is selected correctly.
- Allow the autofocus function to complete its adjustment. If still blurry, try manually adjusting focus via the remote if an option is available.
- Check keystone correction settings if the image is distorted.

6.2 No Sound

- Check the volume level on the projector and any connected audio devices.
- Ensure external speakers are properly connected via Bluetooth or cable.
- If using Bluetooth speakers, confirm they are paired and connected. Note that Bluetooth audio may only work with apps running directly on the projector.

6.3 Apps Not Working / Slow Performance

- Ensure a stable Wi-Fi connection.
- Clear app caches or reinstall problematic apps.
- Avoid updating Google services if performance issues arise, as some users have reported this can cause slowdowns.
- Note that some apps, like Disney+, may not be natively supported and require connection via an external device (e.g., phone, laptop).

6.4 Excessive Noise

The Q1 projector is designed with a new cooling system to significantly reduce fan noise, providing a quieter viewing experience.

Quieter Movie

WiMiUS Projector

10dB - 20dB

Others Projector

30dB - 40dB

Library

30dB - 40dB

Enjoy a quieter movie experience thanks to the projector's optimized cooling system.

7. Specifications

Feature	Specification
Model Number	Q1
Display Resolution	1920 x 1080 (Native 1080P, 4K Supported)
