

Feit Electric FL500

Feit Electric FL500 LED Tactical Flashlight User Manual

Model: FL500 (500 Lumens)

1. INTRODUCTION

Thank you for choosing the Feit Electric FL500 LED Tactical Flashlight. This manual provides essential information for the safe and effective use of your new flashlight. Please read these instructions carefully before operation and retain them for future reference.

The Feit Electric FL500 is a durable, high-performance LED tactical flashlight designed for various applications, including household use, camping, hiking, and emergency situations. It features adjustable focus, two brightness modes, and a robust aluminum alloy construction.

2. SAFETY INFORMATION

- Do not look directly into the LED light beam.
- Keep out of reach of children.
- Always use the correct size and type of batteries as specified.
- Do not mix old and new batteries, or different types of batteries.
- Remove batteries if the flashlight will not be used for an extended period.
- Dispose of used batteries properly according to local regulations.
- The tactical strike bezel is designed for emergency use; handle with care.

3. PACKAGE CONTENTS

- 1 x Feit Electric FL500 LED Tactical Flashlight

Note: 3 AAA batteries are required and are not included in the package.

4. SETUP AND BATTERY INSTALLATION

1. Unscrew the tail cap of the flashlight by turning it counter-clockwise.
2. Insert three (3) AAA alkaline batteries into the battery holder, ensuring correct polarity (+/-) as indicated.
3. Place the battery holder with batteries into the flashlight body.
4. Screw the tail cap back on clockwise until securely tightened.

CAUTION

Dispose of used batteries promptly according to local recycling or waste regulations. Always purchase the correct size and grade of batteries most suitable for the intended use. Do not mix alkaline, standard (carbon zinc), or rechargeable (nickel cadmium) batteries. Replace all batteries at the same time. Clean battery contacts and also device contacts prior to installing batteries. Ensure the batteries are installed correctly with regard to polarity (+ and -). Remove batteries from equipment when not being used for an extended period of time. Remove used batteries promptly. The LED in this flashlight is not replaceable.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. Any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

IDEAL FOR:

- CAMPING • SAFETY
- HIKING • WALKING
- AUTO

Sliding Zoom Focus

Tactical Design

INSTRUCTIONS

1. Insert three "AAA" alkaline batteries into battery holder with polarity as shown on top of battery holder. Replace battery holder with arrow facing forward.
2. Cycle through High, Off, Low, Off settings by pressing the rubber button.
3. Zoom in or out by sliding head of flashlight.

5. OPERATING INSTRUCTIONS

5.1 Power On/Off and Brightness Modes

- To turn the flashlight ON, press the power button located on the tail cap.
- To cycle through brightness modes (High, Low), lightly press the power button again without fully clicking it off.
- To turn the flashlight OFF, fully press the power button until it clicks.

5.2 Adjustable Focus (Zoom Function)

The flashlight features a sliding head for adjustable focus, allowing you to switch between a wide floodlight and a narrow spotlight beam.

- To adjust the beam, slide the head of the flashlight forward or backward.
- Slide forward for a narrow, focused beam (spotlight).
- Slide backward for a wide, dispersed beam (floodlight).

6. MAINTENANCE

6.1 Cleaning

- Wipe the flashlight body with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Clean the lens gently with a lens cleaning cloth to maintain optimal light output.

6.2 Battery Replacement

Replace batteries when the light output becomes dim or inconsistent. Follow the battery installation steps in Section 4.

6.3 Storage

Store the flashlight in a cool, dry place. If storing for an extended period, remove the batteries to prevent

leakage and damage to the device.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Flashlight does not turn on.	Dead or incorrectly installed batteries.	Check battery polarity. Replace with new AAA batteries.
Light is dim or flickers.	Low battery power. Loose tail cap.	Replace batteries. Ensure tail cap is securely tightened.
Cannot adjust focus.	Head mechanism is stuck.	Gently twist and slide the head. Ensure no debris is obstructing movement.
