HORL HO2N

HORL 2 Walnut Rolling Knife Sharpener User Manual

Model: HO2N | Brand: HORL

INTRODUCTION

The HORL 2 Walnut Rolling Knife Sharpener is designed to provide razor-sharp edges for a variety of knives with ease and precision. This system combines durable diamond and ceramic discs with a magnetic angle support, offering two distinct sharpening angles to suit different blade types and cutting needs. Whether you require a fine edge for delicate tasks or a robust edge for heavy-duty use, the HORL 2 delivers consistent and professional sharpening results.

PRODUCT COMPONENTS

The HORL 2 system consists of two primary components:

- **HORL 2 Rolling Sharpener:** This cylindrical unit houses two interchangeable sharpening discs: a diamond grinding disc for initial sharpening and a ceramic honing disc for refining the edge.
- **Magnetic Angle Support:** Crafted from walnut, this base features strong magnets and two preset sharpening angles (15° and 20°) to securely hold your knife at the optimal position during sharpening.

SETUP

Before sharpening, ensure your workspace is stable and clean. Place the Magnetic Angle Support on a flat, non-slip surface. Select the desired sharpening angle (15° or 20°) on the magnetic support. The 15° angle is ideal for fine cutting work, such as sushi or Damascus knives, while the 20° angle provides a robust edge suitable for general kitchen tasks and outdoor knives.

Carefully place your knife blade onto the magnetic surface of the angle support, ensuring the blade is securely held and the edge is positioned correctly for sharpening. The strong magnets will keep the knife firmly in place.

OPERATING INSTRUCTIONS

The sharpening process involves two main steps: grinding and honing.

1. Grinding (Diamond Disc)

Use the diamond grinding disc (coarser side) of the rolling sharpener for the initial sharpening. This disc is made with industrial diamonds, which are highly durable and efficient for sharpening knives of any hardness, including European kitchen knives, hard or soft steel, stainless, and rust-resistant steels.

1. With the knife securely attached to the Magnetic Angle Support, hold the HORL 2 Rolling Sharpener with the diamond disc facing the blade.
2. Roll the sharpener along the entire length of the blade, applying light, consistent pressure. Ensure the sharpener maintains contact with both the blade and the magnetic support.
3. Perform several passes on one side of the blade until a burr (a slight raised edge) is formed on the opposite side.
4. Flip the knife over on the magnetic support and repeat the grinding process on the other side until the burr is removed or transferred.

2. Honing (Ceramic Disc)

After grinding, switch to the ceramic honing disc (finer side) of the rolling sharpener. This disc refines the edge, removing any remaining burrs and polishing the blade for a smooth, razor-sharp finish.

1. Rotate the HORL 2 Rolling Sharpener to use the ceramic honing disc.
2. Roll the ceramic disc along the entire length of the blade, applying very light pressure. The goal is to polish the edge, not to remove significant material.
3. Perform several passes on each side of the blade.
4. Test the sharpness of your knife. If needed, repeat the honing process until the desired sharpness is achieved.

MEET THE INVENTORS. MEET THE FAMILY.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your HORL 2 sharpener.

- **Cleaning Discs:** After each use, wipe the diamond and ceramic discs with a damp cloth to remove any metal particles. For stubborn residue, a soft brush can be used. Ensure the discs are completely dry before storage.
- **Cleaning Magnetic Support:** Wipe the magnetic angle support with a dry or slightly damp cloth. Avoid abrasive cleaners that could damage the walnut finish or the silicone padding.
- **Storage:** Store the HORL 2 sharpener and magnetic angle support in a dry place, away from direct sunlight and extreme temperatures. The original packaging is ideal for storage.
- **Disc Replacement:** The sharpening discs are designed for long-term use, but can be replaced if they show signs of wear or reduced effectiveness. Replacement discs are available from HORL authorized retailers.

TROUBLESHOOTING

If you encounter issues while using your HORL 2 sharpener, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Knife not getting sharp.	Insufficient passes, incorrect angle, or very dull blade.	Ensure the correct angle (15° or 20°) is used. Increase the number of passes with the diamond disc, especially for very dull knives. Apply light, consistent pressure.
Knife slips on magnetic support.	Surface is dirty or wet, or knife is not properly seated.	Clean and dry the magnetic surface and the knife blade. Ensure the knife is fully seated against the magnetic support.
Uneven sharpening.	Inconsistent rolling motion or pressure.	Maintain a smooth, consistent rolling motion across the entire blade length. Ensure even pressure is applied throughout the sharpening process.

SPECIFICATIONS

Feature	Detail
---------	--------

Feature	Detail
Brand	HORL
Model Number	HO2N
Material	Walnut
Color	Walnut
Product Dimensions	5.31"L x 4.72"W x 2.56"H
Grit Type	Medium (Diamond and Ceramic)
Number of Items	1
Manufacturer	HORL-1993 GmbH
UPC	767523848976

WARRANTY AND SUPPORT

The HORL 2 Walnut Rolling Knife Sharpener is manufactured with high-quality materials and undergoes rigorous quality control. For detailed warranty information and customer support, please refer to the official HORL website or contact your authorized retailer. Keep your proof of purchase for any warranty claims.

For further assistance or inquiries, please visit the [HORL Store on Amazon](#) or contact HORL-1993 GmbH directly.
