TMY V28

TMY Mini WiFi Projector User Manual

MODEL: V28

Brand: TMY

INTRODUCTION

Thank you for choosing the TMY Mini WiFi Projector V28. This portable 1080P HD projector is designed to provide a versatile and immersive viewing experience, whether for home entertainment, outdoor movies, or presentations. Featuring WiFi and Bluetooth connectivity, it offers seamless integration with various devices, including smartphones, PCs, TV sticks, and gaming consoles. This manual provides detailed instructions to help you set up, operate, maintain, and troubleshoot your projector for optimal performance.

WHAT'S IN THE Box

- Projector
- HDMI Cable
- Power Cord
- User Manual
- FAQ

SETUP

Follow these steps for initial setup of your TMY Mini WiFi Projector V28:

1. **Placement:** Place the projector on a stable, flat surface. Ensure there is adequate ventilation around the device. For optimal viewing, position the projector perpendicular to your projection surface (wall or screen).
2. **Power Connection:** Connect the power cord to the projector's power input and then to a power outlet. The projector will power on or enter standby mode.
3. **Focus Adjustment:** Turn the focus ring on the projector lens until the projected image is clear and sharp.
4. **Keystone Correction:** Use the digital keystone correction feature to adjust the image if it appears trapezoidal.

This corrects distorted images when the projector is not perfectly aligned with the screen. Refer to the on-screen menu for specific adjustment options.

OPERATING INSTRUCTIONS

WiFi Connection (Screen Mirroring)

The TMY V28 projector supports wireless screen mirroring for both iOS and Android devices. Ensure your projector and smart device are connected to the same WiFi network.

1. Select 'Screen Mirroring' or 'WiFi Display' from the projector's main menu.
2. On your smartphone or tablet, enable 'Screen Mirroring', 'Smart View', 'AirPlay', or similar casting features.
3. Select the projector's name from the list of available devices.
4. Your device's screen should now be mirrored on the projector.

Note: For copyrighted content from streaming services like Amazon Prime Video or Hulu, direct screen mirroring may be restricted. In such cases, connect via HDMI using a TV stick (e.g., Fire TV Stick, Roku) or a Chromecast device.

Wired Connections

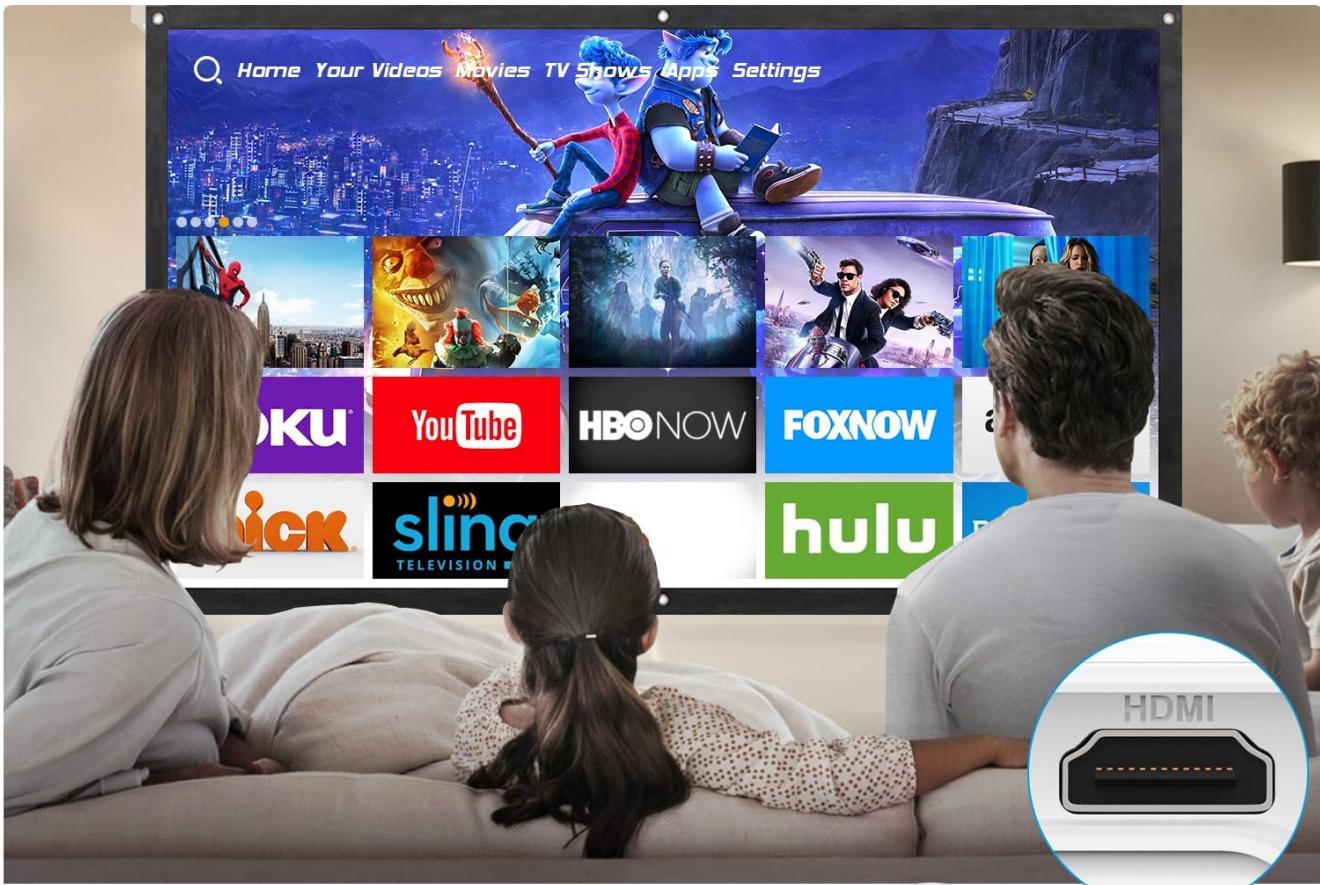

The projector offers multiple ports for connecting various devices:

- **HDMI:** Connect TV sticks/boxes, game consoles (PS5, Xbox), PCs, laptops, DVD players.
- **USB:** Play media directly from USB flash drives.
- **TF Card:** Insert a TF (MicroSD) card to view photos or videos.
- **VGA:** Connect older PCs or laptops.
- **AV:** Connect legacy devices like VCRs or older DVD players.

Better sound quality and less working sound

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your projector:

- **Lens Cleaning:** Use a soft, lint-free cloth specifically designed for optical lenses to gently wipe the projector lens. Avoid abrasive materials or harsh chemicals.
- **Dust Removal:** Regularly clean the ventilation vents to prevent dust buildup, which can affect cooling and performance. Use a soft brush or compressed air.
- **Storage:** When not in use for extended periods, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Cooling System:** The projector has an efficient cooling system. Ensure it is not blocked during operation to prevent overheating.

TROUBLESHOOTING

If you encounter issues with your TMY Mini WiFi Projector, refer to the common problems and solutions below:

Problem	Possible Solution
No image or blurry image	Check power connection. Adjust focus ring. Ensure correct input source is selected. Adjust keystone correction.
No sound	Check volume settings on both projector and connected device. Ensure external speakers are properly connected if used.
WiFi connection issues	Ensure projector and device are on the same WiFi network. Restart both devices. Check WiFi signal strength.
Remote control not working	Check battery. Ensure no obstructions between remote and projector's IR receiver.
Overheating	Ensure ventilation vents are clear. Do not block airflow. Allow projector to cool down.
