## SETUP

### 1. Setting the Time

1. **Pull out the crown:** Gently pull the crown (the small knob on the side of the watch case) outwards to position 2.
2. **Adjust the time:** Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the correct time.
3. **Push in the crown:** Once the time is set, push the crown back into its original position (position 1) to start the watch movement.

## 2. Strap Adjustment

The silicone strap is designed for comfort and flexibility. Adjust the buckle to find a snug yet comfortable fit on your wrist. Ensure the watch is not too tight to avoid discomfort or too loose to prevent excessive movement.

## OPERATING YOUR WATCH

### Time Reading

Your Fastrack Trendies watch features an analog display with hour, minute, and second hands. Read the time by observing the position of these hands on the dial.

### Water Resistance (5 ATM / 50 meters)

This watch is water-resistant up to 5 ATM (50 meters). This means it is suitable for everyday use and can withstand splashes, rain, and brief immersion in water, such as showering or swimming in shallow water. *It is not suitable for diving.*

*snorkeling, or high-impact water sports.*

- Do not operate the crown or pushers while the watch is wet or submerged.
- Avoid exposing the watch to hot water or steam, as this can compromise the water resistance seals.

## MAINTENANCE

### Cleaning Your Watch

- Wipe the watch case and strap with a soft, dry cloth regularly to remove dust and dirt.
- For the silicone strap, you can use a mild soap solution and a soft brush, then rinse thoroughly with clean water and dry completely.
- Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the watch's finish or strap material.

## Battery Replacement

Your watch is powered by a quartz battery. When the watch stops running, it indicates that the battery needs replacement. It is recommended to have the battery replaced by an authorized Fastrack service center or a qualified watch technician to ensure proper sealing and maintain water resistance.

## Storage

When not in use, store your watch in a cool, dry place, away from direct sunlight, extreme temperatures, and strong magnetic fields.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not running	Battery depleted; Crown not pushed in	Replace battery (professional service recommended); Push crown fully into position 1.
Time is inaccurate	Incorrect time setting; Strong magnetic field exposure; Low battery	Reset time correctly; Keep watch away from magnets; Replace battery.
Condensation inside watch	Temperature change; Compromised water resistance seal	Consult an authorized service center immediately. Do not attempt to open the watch.
