4. OPERATING INSTRUCTIONS

The SwiftCharge PowerDisc Wireless Charger utilizes the universal Qi wireless charging protocol.

1. **Place Your Device:** Gently place your Qi-compatible device (e.g., smartphone) onto the center of the SwiftCharge PowerDisc Wireless Charger.
2. **Charging Indicator:** The smart LED indicator on the charger will automatically light up when it detects your device and begins charging.
3. **Charging Completion:** The LED indicator will turn off when the device is not in use or when charging is complete (depending on your device's charging status).

For optimal charging performance, ensure your device is centered on the charging pad and remove any thick cases that might interfere with wireless charging.

5. MAINTENANCE

To ensure the longevity and proper function of your charger:

- **Cleaning:** Disconnect the charger from the power source before cleaning. Use a soft, dry cloth to wipe the surface. Do not use harsh chemicals or abrasive materials.
- **Storage:** When not in use, store the charger in a cool, dry place away from direct sunlight and extreme temperatures.

6. TROUBLESHOOTING

If you encounter issues with your SwiftCharge PowerDisc Wireless Charger, refer to the following common solutions:

Problem	Possible Solution
Device not charging	Ensure the charger is properly connected to a power outlet. Verify your device is Qi-compatible. Reposition your device to ensure it is centered on the charging pad. Remove any thick phone cases that may obstruct wireless charging.
Slow charging	Ensure you are using the included 12V 2A (24W) power adapter for optimal 15W output. Check for any foreign objects between the device and the charging pad. Some phone cases can reduce charging efficiency.
LED indicator not lighting up	Confirm the charger is receiving power. Ensure a Qi-compatible device is placed correctly on the pad.
