## TROUBLESHOOTING

This section addresses common issues you might encounter with your futon sofa bed.

- **Sofa feels unstable:** Ensure all four legs are securely tightened. Check that the sofa is placed on a flat, even surface. Uneven flooring can cause wobbling.
- **Difficulty converting to bed:** Verify that there are no obstructions behind the backrest. Ensure you are pushing the backrest forward slightly to disengage the locking mechanism before reclining it.
- **Backrest does not stay in position:** Confirm that the backrest has clicked into one of the three gear positions. If it does not click, check for any debris or obstruction in the mechanism.
- **Squeaking noises:** Over time, joints may loosen. Re-tighten all screws, especially those connecting the legs and the backrest mechanism.
