

## Green Valley Easy One EVO 03

# Green Valley Easy One EVO 03 Pre-assembled Steel Roof Bar Instruction Manual

Model: Easy One EVO 03 | Brand: Green Valley

## 1. PRODUCT OVERVIEW

The Green Valley Easy One EVO 03 is a complete steel roof bar system designed for vehicle transport needs. It features pre-assembled feet for straightforward installation, providing a robust and secure platform for carrying various loads on your vehicle's roof.

## 2. SAFETY INSTRUCTIONS

---

Read all instructions carefully before installation and use. Failure to follow these instructions may result in property damage or personal injury.

- **Weight Limit:** Do not exceed the maximum load capacity specified by your vehicle manufacturer or the roof bar system, whichever is lower.
- **Secure Fastening:** Ensure all components are securely fastened before driving. Check tightness regularly, especially after the first few kilometers and after driving on rough roads.
- **Load Distribution:** Distribute the load evenly on the roof bars. Secure items properly to prevent shifting during transit.
- **Driving Speed:** Adjust your driving speed to suit the load and road conditions. Avoid sudden braking or sharp turns.
- **Height Clearance:** Be aware of the increased vehicle height when entering garages, car washes, or low-clearance areas.
- **Maintenance:** Regularly inspect the roof bars for wear, damage, or corrosion. Replace any damaged parts

immediately.

### 3. PACKAGE CONTENTS

---

Verify that all components are present and undamaged before beginning installation.

- 2 x Steel Roof Bars
- 4 x Pre-assembled Feet (with mounting hardware)
- 1 x Instruction Manual (this document)

### 4. INSTALLATION GUIDE

---

The Green Valley Easy One EVO 03 roof bars come with pre-assembled feet for simplified installation. Follow these steps carefully.

1. **Prepare Your Vehicle:** Ensure your vehicle's roof is clean and free of debris where the roof bars will be mounted. Identify the designated mounting points on your vehicle's roof (refer to your vehicle's owner's manual if unsure).
2. **Position the Feet:** Place the pre-assembled feet onto the designated mounting points on your vehicle's roof. Ensure they are correctly oriented and aligned.
3. **Attach Roof Bars:** Carefully place the steel roof bars onto the feet. The bars should slot securely into the designated channels or mounts on the feet.
4. **Secure Fasteners:** Using the provided tools (if any) or appropriate wrenches, tighten all fasteners on the feet to secure the roof bars to your vehicle. Tighten evenly on both sides to ensure a balanced and secure fit. Do not overtighten.

5. **Final Check:** After tightening, gently push and pull on the roof bars to ensure they are firmly attached and do not wobble. Double-check all fasteners for tightness.

Figure 4: Close-up view of a pre-assembled foot, showing the secure attachment point.

## 5. Usage Instructions

Once installed, your Green Valley Easy One EVO 03 roof bars are ready for use. Always adhere to the safety guidelines.

- **Loading:** Place items on the roof bars, ensuring even weight distribution. Use appropriate tie-down straps or cargo nets to secure your load.
- **Aerodynamics:** For optimal fuel efficiency and reduced wind noise, remove the roof bars when not in use, especially for long journeys.
- **Regular Checks:** Periodically check the tightness of the roof bar fasteners and the security of your load during long trips.

## 6. Maintenance and Care

Proper maintenance ensures the longevity and safe operation of your roof bars.

- **Cleaning:** Clean the roof bars regularly with mild soap and water. Avoid abrasive cleaners or solvents that could damage the finish.
- **Inspection:** Before each use, inspect the bars and feet for any signs of damage, cracks, rust, or loose components.
- **Storage:** When not in use, store the roof bars in a dry, protected area to prevent corrosion and damage.

## 7. Troubleshooting

Refer to this section for common issues and their solutions.

| Problem                                  | Possible Cause                                               | Solution                                                                                           |
|------------------------------------------|--------------------------------------------------------------|----------------------------------------------------------------------------------------------------|
| Roof bars feel loose after installation. | Fasteners not tightened sufficiently.                        | Re-tighten all fasteners evenly. Ensure they are snug but do not overtighten.                      |
| Excessive wind noise during driving.     | Aerodynamic drag from empty bars or improperly secured load. | Ensure bars are correctly positioned. Remove bars when not in use. Secure load properly.           |
| Difficulty fitting bars to vehicle.      | Incorrect model for vehicle or improper alignment.           | Verify the roof bar model is compatible with your vehicle. Re-check alignment and mounting points. |
