Duracell 1600258

Duracell 2500 Lumens Variable Focus LED Flashlight User Manual

Model: 1600258

Introduction

Thank you for choosing the Duracell 2500 Lumens Variable Focus LED Flashlight. This powerful and durable flashlight is designed for various lighting needs, offering exceptional brightness and adjustable focus. This manual provides essential information for the safe and effective use, maintenance, and troubleshooting of your new flashlight.

Safety Information

- **Eye Safety:** Do not look directly into the LED light or shine it directly into anyone's eyes. The high intensity light can cause temporary vision impairment or permanent eye damage.
- **Battery Safety:** Use only the specified type and number of batteries (12 AA Alkaline batteries). Do not mix old and new batteries, or different types of batteries. Insert batteries with correct polarity (+/-). Remove batteries if the flashlight will not be used for an extended period to prevent leakage.
- **Heat:** The flashlight may become warm during prolonged use, especially on high brightness settings. This is normal. Avoid covering the head of the flashlight during operation to allow for proper heat dissipation.
- **Water Resistance:** This flashlight is *not* water resistant. Avoid exposure to water or high humidity to prevent damage.
- **Children:** Keep out of reach of children. This is not a toy.

Package Contents

Please verify that all items are present in your package:

- Duracell 2500 Lumens Variable Focus LED Flashlight
- 12 x AA Alkaline Batteries

Setup

Battery Installation

1. Unscrew the tail cap of the flashlight by turning it counter-clockwise.
2. Insert the 12 AA alkaline batteries into the battery compartment, ensuring correct polarity (+ and -) as indicated inside the flashlight. All batteries must be inserted in the same direction.
3. Screw the tail cap back on clockwise until it is securely tightened. Do not overtighten.

Operating Instructions

Power On/Off and Mode Selection

The flashlight features a single button for power control and mode cycling, located on the tail cap.

- **To Turn On:** Press the power button once. The flashlight will turn on in its default mode (typically High).
- **To Cycle Modes:** With the flashlight on, press the power button repeatedly to cycle through the available brightness modes: High → Low → Strobe.
- **To Turn Off:** Press the power button after cycling through all modes, or press and hold the button for approximately 2 seconds from any mode.

Variable Focus Adjustment

The flashlight features a variable focus head, allowing you to adjust the beam from a wide floodlight to a narrow spotlight.

- **To Adjust Focus:** Gently slide the head of the flashlight forward or backward. Sliding it forward will narrow the beam for a spotlight effect, while sliding it backward will widen the beam for a floodlight effect.

Image: The Duracell 2500 Lumens Variable Focus LED Flashlight with its head extended, demonstrating the variable focus feature.

Maintenance

- **Cleaning:** Wipe the flashlight body with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Battery Replacement:** Replace all 12 AA batteries simultaneously when the light dims significantly or stops functioning. Always use fresh, new alkaline batteries.
- **Storage:** Store the flashlight in a cool, dry place away from direct sunlight. If storing for an extended period, remove the batteries to prevent leakage and corrosion.

Troubleshooting

Problem	Possible Cause	Solution
Flashlight does not turn on.	Batteries are dead or incorrectly inserted.	Replace all 12 AA batteries with new ones, ensuring correct polarity.
Light is dim or flickers.	Low battery power.	Replace all 12 AA batteries with new ones.
Focus mechanism is stiff.	Dirt or debris in the sliding mechanism.	Gently clean the sliding parts with a soft, dry cloth. Do not apply lubricants.
Flashlight gets hot during use.	Normal operation for high-power LED flashlights.	Reduce usage time on high mode or switch to a lower brightness setting if discomfort occurs. Ensure proper ventilation.

Specifications

Feature	Specification

Feature	Specification
Model Number	1600258
Brightness	2500 Lumens (High)
Light Source	LED
Power Source	12 x AA Alkaline Batteries (included)
Material	Aluminum

Answered questions about this manual

After replacing the batteries in my Duracell 2500 Lumens Variable Focus LED Flashlight (Model 1600258), I noticed corrosion or battery leakage on the internal connection. Is there a way to remove the light head to clean the connection behind it?

The user manual for the Duracell 2500 Lumens Variable Focus LED Flashlight (Model 1600258) does not provide instructions for removing the light head or disassembling the internal components. The manual only describes unscrewing the...
