## GRIFEMA GA1001

# GRIFEMA GA1001 Combination Padlock User Manual

Model: GA1001

## INTRODUCTION

---

Thank you for choosing the GRIFEMA GA1001 4-Digit Combination Padlock. This padlock is designed for enhanced security and durability, featuring a robust zinc alloy construction and weatherproof capabilities. It is ideal for securing lockers, fences, garages, gates, storage cases, toolboxes, and sheds. This manual provides detailed instructions on how to set up, operate, and maintain your padlock.

**10 TIMES SAFER THAN 3-DIGIT LOCK**

4 Digit offers  
10,000 combinations

Image: Visual comparison illustrating that a 4-digit combination lock offers 10,000 combinations, making it significantly more secure than a 3-digit lock.

## SETUP: SETTING YOUR COMBINATION

Your padlock comes with a factory preset combination of **0-0-0-0**. To set your personal combination, follow these steps:

1. Set the default combination (0-0-0-0) and pull up the shackle.
2. Turn the shackle about 90 degrees to the code setting gap.
3. Push the shackle down until the tiny pin is fully inside the gap.
4. Keep the shackle in place and turn it to the code side window.
5. Scroll the number dials to set your desired new code. Ensure the numbers are aligned with the indicators.
6. Turn the shackle back until it pops up. Your new combination is now set. Remember your new combination as there is no master key to open the lock.

# SET YOUR OWN CODE

Lightweight & Portable

- 1 Set the default(0-0-0-0)code and pull up the shackle.
- 2 Turn the shackle about 90 degrees to the code setting gap.

- 3 Push it down until the tiny pin is fully inside the gap.
- 4 Keep it in place and turn to the code side window.

- 5 Scroll the number to set your own code.
- 6 Turn back the shackle until it pops up.

## OPERATING INSTRUCTIONS

To open the padlock, align your set 4-digit combination with the indicators on the side of the lock, then pull up the shackle. To lock, simply push the shackle down and scramble the numbers to secure it. Always ensure the numbers are scrambled after locking to prevent unauthorized access.

## MAINTENANCE

The GRIFEMA GA1001 padlock is constructed with durable zinc alloy and designed to be weatherproof, offering high resistance to cutting and hammering. To ensure its longevity and smooth operation:

- Regularly wipe the padlock with a clean, dry cloth to remove dirt and grime.
- For outdoor use, occasional lubrication of the shackle mechanism with a silicone-based lubricant can help maintain smooth operation and prevent corrosion.
- Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.

Image: Visual representation of the padlock's robust features, including its strong construction, high security, and weatherproof properties, capable of withstanding various conditions.

## TROUBLESHOOTING

- **Combination not opening:** Double-check that all four digits are correctly aligned with the indicators. Ensure you are using the most recently set combination. If you have forgotten your combination, there is no way to reset it without knowing the current code.
- **Shackle is stiff or stuck:** Apply a small amount of lubricant (e.g., graphite powder or silicone spray) to the shackle mechanism and work it back and forth. Ensure no debris is obstructing the shackle.
- **Dials are hard to turn:** Clean the dials with a soft brush to remove any dust or dirt. A small amount of lubricant can also be applied to the dial mechanism if needed.

## PRODUCT SPECIFICATIONS

Feature	Detail
Brand	GRIFEMA
Model Name	GA1001

Lock Type	Combination Lock
Material	Zinc Alloy
Color	Black
Item Dimensions (L x W x H)	1.69 x 0.87 x 3.11 inches
