Skechers Men's Ralcon SD-Satico Open Toe Sandal Instruction Manual

Model: 204357

1. PRODUCT OVERVIEW

The Skechers Men's Ralcon SD-Satico Open Toe Sandal, model 204357, is designed for comfort and durability. It features neoprene-backed adjustable straps, a robust Goodyear rubber outsole, and Luxe Foam cushioning for enhanced comfort. The sandal is also water-resistant, making it suitable for various environments.

2. SETUP AND ADJUSTMENT

To ensure a comfortable and secure fit, adjust the hook-and-loop straps located on the sandal. These neoprene-backed straps allow for personalized adjustment across the foot and around the ankle.

1. **Forefoot Strap:** Loosen or tighten the strap over the forefoot to achieve a snug yet comfortable fit.
2. **Instep Strap:** Adjust the strap over the instep to secure your foot firmly in place without causing pressure points.
3. **Heel Strap:** If present, adjust the heel strap to prevent your foot from sliding forward or backward within the sandal.

3. WEARING AND COMFORT

The Ralcon SD-Satico sandal features a *Relaxed Fit* design, providing a roomy and comfortable feel. The *Luxe Foam* footbed offers superior cushioning and support for extended wear. Its water-resistant properties make it suitable for various outdoor activities and wet conditions.

4. MAINTENANCE AND CARE

To maintain the quality and longevity of your Skechers Ralcon SD-Satico sandals, follow these care instructions:

- **Cleaning:** For general cleaning, wipe the neoprene and outer materials with a damp cloth and mild soap. Avoid harsh chemicals.
- **Drying:** Allow sandals to air dry naturally. Do not expose them to direct heat sources, such as radiators or direct sunlight for prolonged periods, as this may damage the materials.
- **Storage:** Store sandals in a cool, dry place away from direct sunlight when not in use.
- **Sole Care:** The Goodyear rubber outsole is designed for durability. Regularly check for any embedded debris and remove it to maintain traction.

5. TROUBLESHOOTING

Most issues with sandals relate to fit or cleaning. If you encounter problems, consider the following:

- **Discomfort/Rubbing:** Re-adjust all hook-and-loop straps to ensure they are neither too tight nor too loose. Ensure no debris is trapped between your foot and the sandal.
- **Slipping:** If the sandal feels loose, tighten the straps. If slipping occurs on wet surfaces, exercise caution as no footwear can guarantee slip-proof performance.
- **Odor:** Regular cleaning as described in Section 4 can help prevent odor buildup. Ensure sandals are fully dry before storage.

6. SPECIFICATIONS

Feature	Detail
Model Number	204357
Brand	Skechers
Department	Men's
Outer Material	Neoprene
Sole Material	Rubber (Goodyear)
Closure Type	Hook & Loop
