

Supershieldz SS-SP-Surfans-Y57 Kids Tablet-3P

Supershieldz Screen Protector for Surfans Y57 Kids Tablet (7-inch)

Installation and Care Manual

INTRODUCTION

Thank you for choosing the Supershieldz Screen Protector for your Surfans Y57 Kids Tablet. This product is designed to provide superior protection against scratches, dust, and abrasions while maintaining the original clarity and touch sensitivity of your device's screen. Our screen protectors are crafted from high-quality Japanese Polyethylene Terephthalate (PET) film, custom-cut for a perfect fit, and feature a five-layer construction for enhanced durability.

PACKAGE CONTENTS

- 3 x Supershieldz Screen Protectors for Surfans Y57 Kids Tablet (7-inch)
- 1 x Microfiber Cleaning Cloth
- 1 x Dust Removal Sticker
- 1 x Squeegee Card (for bubble removal)

SETUP AND INSTALLATION

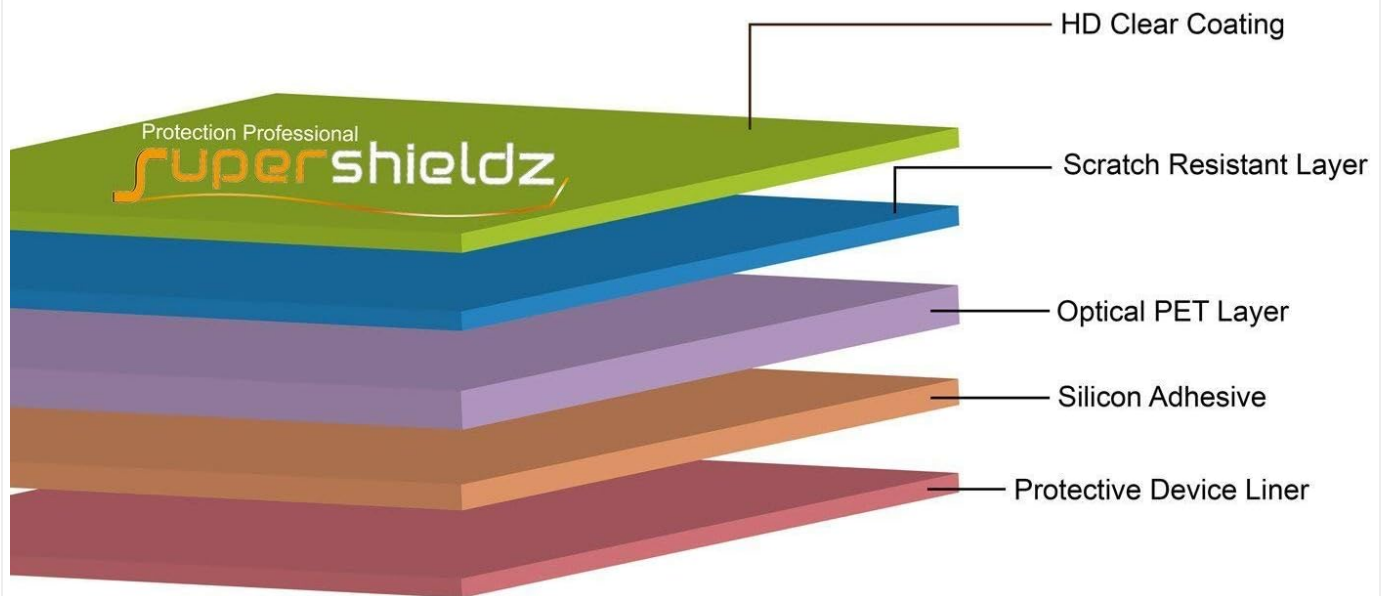

Proper installation is crucial for optimal performance. Please follow these steps carefully:

- 1. Prepare Your Workspace:** Choose a clean, dust-free environment. Wash your hands thoroughly to avoid transferring oils or dirt to the screen or protector.
- 2. Clean the Tablet Screen:** Use the provided microfiber cleaning cloth to wipe the tablet screen thoroughly. Ensure all smudges, fingerprints, and dirt are removed.
- 3. Remove Dust:** Use the dust removal sticker to dab the screen and lift any remaining dust particles. Inspect the screen carefully under good lighting to ensure it is completely free of dust.
- 4. Peel Off Layer 1:** Carefully peel back about one inch of the protective film labeled 'Layer 1' (or similar) from one end of the screen protector. Avoid touching the adhesive side.
- 5. Align the Protector:** Align the exposed edge of the screen protector with the edge of your tablet screen. Pay close attention to cutouts for cameras, sensors, or buttons to ensure a precise fit.
- 6. Apply and Smooth:** Slowly lower the screen protector onto the tablet screen, gradually peeling off more of 'Layer 1' as you go. Use the squeegee card to gently push out any air bubbles towards the edges as you apply.

7. **Remove Remaining Bubbles:** If bubbles remain, gently lift the nearest edge of the protector and re-apply, using the squeegee card to push the air out. Small bubbles may disappear within 24-48 hours.
8. **Peel Off Layer 2 (if applicable):** Some screen protectors have a second protective film on top. If present, carefully peel off the film labeled 'Layer 2' (or similar) to reveal the final screen protector surface.

The Supershieldz screen protector features a 5-layer construction for enhanced durability and clarity. This design ensures maximum protection while maintaining optical transparency.

5 Layer Protective Film

This diagram shows the five distinct layers of the Supershieldz screen protector: HD Clear Coating, Scratch Resistant Layer, Optical PET Layer, Silicon Adhesive, and Protective Device Liner. Each layer contributes to the protector's durability and clarity.

OPERATING THE SCREEN PROTECTOR

Once installed, the Supershieldz screen protector operates passively. It provides continuous protection to your tablet's screen without interfering with touch functionality or display clarity. You can use your tablet as normal, enjoying the added peace of mind that your screen is safeguarded against daily wear and tear.

MAINTENANCE

To keep your screen protector in optimal condition and ensure maximum clarity:

- **Cleaning:** Use a soft, lint-free cloth (like the provided microfiber cloth) to gently wipe the screen protector. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaning solution. Avoid harsh chemicals or abrasive materials.
- **Avoid Sharp Objects:** While the protector is scratch-resistant, extreme pressure from sharp objects can still cause damage.
- **Replacement:** If the screen protector becomes heavily scratched or damaged, it is recommended to replace it with a new one from the 3-pack to maintain optimal screen protection and visual quality.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- Bubbles After Installation:**
Solution: Small bubbles often disappear within 24-48 hours. For larger bubbles, gently lift the nearest edge of the screen protector with a fingernail or the squeegee card, then slowly re-apply while pushing the bubble towards the edge with the squeegee.
- Dust Particles Trapped Underneath:**
Solution: This requires re-application. Carefully lift the screen protector from the nearest corner. Use a dust removal sticker to gently dab the dust particle off the screen or the adhesive side of the protector. Re-apply the protector as per the installation steps.
- Misalignment:**
Solution: If the protector is significantly misaligned, carefully lift it from one corner and re-align it. It's best to do this immediately after initial application before the protector fully settles.
- Reduced Touch Sensitivity:**
Solution: Supershieldz protectors are designed for true touch sensitivity. If you experience issues, ensure the protector is applied smoothly without air gaps. If the problem persists, ensure your tablet's touch settings are calibrated correctly or consider replacing the protector.

SPECIFICATIONS

Brand	Supershieldz
Model Number	SS-SP-Surfans-Y57 Kids Tablet-3P
Compatible Device	Surfans Y57 Kids Tablet (7-inch)
Material	Polyethylene Terephthalate (PET)
Screen Size	7 inches
