

MINISO MINISO

MINISO Mini Wireless Keyboard and Mouse Combo User Manual

MODEL: MINISO

Introduction

Thank you for choosing the MINISO Mini Wireless Keyboard and Mouse Combo. This compact and ergonomic set is designed for seamless connectivity and comfortable use with your laptop or PC. This manual provides detailed instructions for setup, operation, maintenance, and troubleshooting to ensure you get the most out of your new device.

Safety Information

- Keep the device away from water and other liquids to prevent electric shock or damage.
- Do not expose the device to extreme temperatures or direct sunlight.
- Avoid dropping or subjecting the device to strong impacts.
- Use only the specified battery type (if applicable) and ensure correct polarity during installation.
- Do not attempt to disassemble or repair the device yourself. Contact qualified personnel for service.
- Dispose of batteries and electronic waste responsibly according to local regulations.

Package Contents

Please check the package for the following items:

- 1 x MINISO Mini Wireless Keyboard
- 1 x MINISO Wireless Mouse
- 1 x USB Receiver (Dongle)
- 1 x User Manual (This document)
- Batteries (may or may not be included, depending on region/package)

Product Overview

An image displaying the white MINISO Mini Wireless Keyboard and the matching white wireless mouse.

The MINISO Mini Wireless Keyboard is a compact, ultra-slim design featuring standard QWERTY layout and function keys. The wireless mouse is ergonomically designed for comfortable grip and precise tracking. Both devices connect wirelessly via a single USB receiver.

- **Keyboard:** Compact layout, function keys (F1-F12), indicator lights (Caps Lock, Num Lock, Battery).
- **Mouse:** Left/Right click buttons, scroll wheel, optical sensor.
- **USB Receiver:** Small dongle for wireless connection.

Setup

1. Install Batteries:

- For the keyboard, open the battery compartment on the back and insert the required batteries (e.g., 2 x AAA, not always included) ensuring correct polarity (+/-). Close the compartment.
- For the mouse, open the battery compartment on the bottom and insert the required battery (e.g., 1 x AA, not always included) ensuring correct polarity (+/-). Close the compartment.

2. Connect USB Receiver:

Locate the USB receiver (dongle), usually stored in the mouse's battery compartment or a small slot on the keyboard. Plug the USB receiver into an available USB port on your computer (PC or Laptop).

3. Power On Devices:

Turn on the keyboard and mouse using their respective ON/OFF switches. These switches are typically located on the back of the keyboard and the bottom of the mouse.

4. Automatic Connection:

The keyboard and mouse should automatically connect to your computer. No drivers are usually required for standard operation. If they do not connect, ensure the USB receiver is firmly plugged in and the devices are powered on.

Operating

- **Keyboard Usage:** Type as you would with any standard keyboard. Use the function keys (F1-F12) for their respective shortcuts, often requiring the 'Fn' key to be pressed simultaneously for multimedia or system functions.
- **Mouse Usage:** Move the mouse to control the cursor. Use the left button for primary clicks, the right button for secondary clicks (context menus), and the scroll wheel for scrolling through documents or web pages.
- **Power Saving Mode:** The keyboard and mouse feature an auto-sleep mode to conserve battery life. They will enter sleep mode after a period of inactivity. To wake them up, simply press any key on the keyboard or move/click the mouse.
- **On/Off Switches:** For extended periods of non-use, it is recommended to turn off the keyboard and mouse using their dedicated ON/OFF switches to further conserve battery.

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the surface of the keyboard and mouse. For stubborn dirt, a slightly damp cloth can be used, but ensure no moisture enters the device. Do not use harsh chemicals or abrasive cleaners.
- **Battery Replacement:** When the battery indicator light (if present) flashes or performance degrades, replace the batteries promptly. Refer to the "Setup" section for battery installation instructions.
- **Storage:** When not in use for a long time, remove the batteries to prevent leakage and store the devices in a cool, dry place.

Troubleshooting

Problem	Solution
---------	----------

Problem	Solution
Keyboard/Mouse not responding.	<ul style="list-style-type: none"> ◦ Ensure batteries are correctly installed and not depleted. Replace if necessary. ◦ Check if the ON/OFF switches on both devices are in the 'ON' position. ◦ Ensure the USB receiver is securely plugged into a working USB port on your computer. Try a different USB port. ◦ Move the devices closer to the USB receiver to rule out interference or range issues. ◦ Restart your computer.
Lagging or intermittent connection.	<ul style="list-style-type: none"> ◦ Replace batteries. ◦ Ensure no large metal objects or other wireless devices are causing interference between the devices and the receiver. ◦ Try plugging the USB receiver into a front USB port or a USB hub to improve line of sight.
Mouse cursor moves erratically.	<ul style="list-style-type: none"> ◦ Clean the optical sensor on the bottom of the mouse. ◦ Use the mouse on a clean, non-reflective surface.
