5. OPERATING YOUR JEKCA SCULPTURE

Once fully assembled, your JEKCA Elephant 01S is a stable and durable sculpture. It is designed for display and

can be handled with care. The interlocking system ensures that individual bricks do not easily detach, maintaining the integrity of the model.

6. MAINTENANCE AND CARE

Cleaning:

To clean your JEKCA sculpture, gently dust it with a soft, dry cloth or a soft-bristled brush. For more stubborn dirt, a slightly damp cloth can be used, but avoid excessive moisture or harsh cleaning agents.

Storage:

Store your JEKCA model in a stable environment, away from direct sunlight and extreme temperatures, to prevent material degradation or discoloration over time.

7. TROUBLESHOOTING

Bricks Not Fitting/Loose Connections:

Ensure that the pins are correctly aligned with the holes in both bricks before insertion. If a connection feels loose, verify that the pin has been rotated 90 degrees using the pin driver to fully lock it into place.

Difficulty Disassembling:

To disassemble, use the pin driver to rotate the pins back 90 degrees to their unlocked position before attempting to separate the bricks. Do not force bricks apart without unlocking the pins, as this may damage the pieces.
