Logicool M575S

Logicool Wireless Trackball Mouse M575S User Manual

Model: M575S

1. PRODUCT OVERVIEW

The Logicool M575S is a wireless trackball mouse designed for comfortable and precise cursor control. It features an ergonomic shape, smooth thumb-controlled trackball, and versatile connectivity options including Logicool's proprietary Unifying USB receiver and Bluetooth. This mouse is engineered to reduce wrist and arm fatigue during extended use, making it suitable for both office and remote work environments.

Key features include:

- Fixed mouse position with trackball for cursor operation, saving desk space.
- Ergonomic design with an angled scroll wheel for natural finger positioning and comfort, fitting a wide range of hand sizes.
- Smooth and precise ball control with 2000 DPI tracking accuracy.
- Dual connectivity: Logicool Unifying USB receiver and Bluetooth.
- Long battery life: up to 24 months with Unifying USB, up to 20 months with Bluetooth.
- Compatible with Windows, macOS, iPadOS, and ChromeOS.

2. PACKAGE CONTENTS

Please ensure all items listed below are present in your package:

- Logicool M575S Wireless Trackball Mouse
- AA Battery (pre-installed or included)
- Logicool Unifying USB Receiver

パッケージ内容

Image: The package contents of the Logi Ergo M575S, including the trackball mouse, a single AA battery, and the compact Unifying USB receiver.

3. SETUP

3.1. Powering On

The M575S trackball mouse uses one AA battery. The battery compartment is located on the underside of the mouse. Ensure the battery is correctly inserted with the positive (+) and negative (-) terminals aligned as indicated. Turn on the mouse using the ON/OFF switch located on the bottom of the device.

接続はBluetoothまたはUnifyingUSBに対応 < UnifyingUSBは電池ケースの中に格納されています >

Image: The underside of the M575S, illustrating the battery compartment and the storage slot for the Unifying USB receiver. The image also shows the receiver being plugged into a laptop's USB port.

3.2. Connecting Your Mouse

The M575S offers two connection methods: Logitech Unifying USB Receiver and Bluetooth.

3.2.1. Unifying USB Receiver Connection

1. Locate the Unifying USB receiver, typically stored inside the battery compartment of the mouse.
2. Plug the Unifying USB receiver into an available USB port on your computer.
3. The mouse should automatically connect. If not, press the connection button on the underside of the mouse (if available) or use the Logitech Options software to pair.

3.2.2. Bluetooth Connection

1. Ensure Bluetooth is enabled on your device (Windows, macOS, iPadOS, ChromeOS).
2. Press and hold the Bluetooth connection button on the underside of the mouse until the LED indicator starts blinking rapidly, indicating it's in pairing mode.

3. On your device, go to Bluetooth settings and select "Logicool M575S" from the list of available devices to pair.

3.3. Software Installation (Logicool Options)

For enhanced functionality and customization, it is recommended to install the Logicool Options software. This free software allows you to customize button assignments, adjust pointer speed (DPI), and manage device connections.

- Download Logicool Options from the official Logicool website: www.logicool.co.jp/ja-jp/software/options.html
- Follow the on-screen instructions to install the software.
- Ensure your Logicool Options software is updated to the latest version for optimal performance, especially when using with iPadOS or newer Windows versions.

4. OPERATING INSTRUCTIONS

4.1. Trackball Operation

The M575S uses a trackball for cursor movement. Instead of moving the entire mouse, you control the cursor by rolling the blue trackball with your thumb.

なめらかで精確な親指でのボール操作 2000DPIの精度でトラッキング

Image: A close-up of a thumb precisely controlling the trackball on the M575S, highlighting the smooth and accurate movement. This method allows for precise control and reduces arm and wrist movement, contributing to comfort during long work sessions.

本体は動かさずトラックボールを転がし カーソルを操作・省スペース

Image: The M575S positioned on a desk, demonstrating how its stationary design saves space compared to traditional mice.

4.2. Button Functions

The M575S features five customizable buttons:

- **Left Click:** Primary selection button.
- **Right Click:** Secondary function button, typically for context menus.
- **Scroll Wheel:** Rolls for vertical scrolling, can be pressed for middle-click functionality. The scroll wheel also has an angled design for natural finger placement.
- **Forward Button:** Default function is to navigate forward in web browsers or file explorers.
- **Back Button:** Default function is to navigate backward in web browsers or file explorers.

All buttons can be customized using the Logi Options software to perform various functions, including application-specific shortcuts.

5. MAINTENANCE

Regular cleaning of your trackball mouse ensures smooth and precise operation. Dust and debris can accumulate around the trackball, affecting its movement.

5.1. Cleaning the Trackball

1. Turn off the mouse using the ON/OFF switch on the underside.
2. Gently push the trackball from the underside of the mouse using your finger or a blunt object until it pops out.
3. Clean the trackball itself with a soft, lint-free cloth.
4. Inside the trackball cavity, you will see three small support points (bearings) and the optical sensor. Use a cotton swab or a cotton stick to carefully clean any dust or debris from these three support points and the sensor area.
5. Once clean, reinsert the trackball into its cavity, ensuring it clicks securely into place.
6. Turn the mouse back on.

6. TROUBLESHOOTING

6.1. Mouse Not Responding

- **Check Power:** Ensure the mouse is turned ON and the battery has sufficient charge. Replace the AA battery if necessary.
- **Check Connection:**
 - *For Unifying USB:* Ensure the receiver is securely plugged into a working USB port. Try a different USB port.
 - *For Bluetooth:* Ensure Bluetooth is enabled on your device and the mouse is paired. Try unpairing and re-pairing the mouse in your device's Bluetooth settings.
- **Interference:** Move the mouse closer to the receiver or Bluetooth-enabled device. Avoid using the mouse near other wireless devices that might cause interference.

6.2. Trackball Movement Is Not Smooth or Jumpy

- This is typically caused by dust or debris accumulating around the trackball's support points or the optical sensor. Refer to the [Maintenance section \(5.1. Cleaning the Trackball\)](#) for detailed cleaning instructions.

6.3. Buttons Not Functioning Correctly

- Ensure the Logicool Options software is installed and updated. Check button assignments within the software.
- If the issue persists, try reinstalling the Logicool Options software.

7. SPECIFICATIONS

Feature	Description
Model Number	M575S
Dimensions (L x W x H)	13.4 x 10 x 4.8 cm
Weight	145 g
Connectivity	Bluetooth, Logicool Unifying USB
Sensor Technology	Optical Trackball
DPI Range	Up to 2000 DPI
Buttons	5 (Left/Right click, Scroll wheel, Forward, Back)
Battery Type	1 x AA Battery

Battery Life	Up to 24 months (Unifying USB), Up to 20 months (Bluetooth)
Wireless Range	Up to 10 meters (33 feet)
Compatible OS	Windows 10, 11 or later; macOS 10.15 or later; iPadOS 14 or later; Chrome OS; Linux

Image: Detailed dimensions of the M575S mouse, indicating its length (134mm), width (100mm), height (48mm), and weight (145g).

8. WARRANTY AND SUPPORT

8.1. Warranty Information

The Logitech M575S Wireless Trackball Mouse comes with a 1-year limited hardware warranty from the date of purchase. This warranty covers defects in materials and workmanship under normal use. Please retain your proof of purchase for warranty claims.

Image: The M575S in use, accompanied by text highlighting its 1-year long-term warranty, emphasizing reliability.

8.2. Customer Support

For further assistance, technical support, or warranty claims, please visit the official Logicool support website:

- Logicool Support: support.logicool.co.jp

You can also find FAQs, troubleshooting guides, and driver downloads on the support website.
