Meliconi Cleaning Tower Instruction Manual

Freestanding Organizer Stand for Dyson V6, V7, V8, V10, V11, V12 Slim, V15 Vacuums

1. PRODUCT OVERVIEW

The Meliconi Cleaning Tower is a robust and elegant freestanding support designed to organize your Dyson cordless vacuum cleaner and its accessories. It eliminates the need for wall drilling, providing a stable and convenient storage solution.

Key Features:

- **Freestanding Design:** No wall drilling required.
- **Accessory Storage:** Accommodates up to 8 vacuum accessories.
- **Cable Management:** Integrated cable routing system for a tidy appearance.
- **Compatibility:** Designed for Dyson V6, V7, V8, V10, V11, V12 Slim, and V15 models.
- **Durable Construction:** Made from high-quality steel and aluminum.
- **Floor Protection:** Equipped with protective rubber feet to prevent scratches and ensure stability.

2. PACKAGE CONTENTS

Before assembly, ensure all components are present:

- Base Plate

- Vertical Support Column
- Accessory Hooks (quantity may vary)
- Mounting Hardware (screws, Allen key)
- Instruction Manual (this document)

3. SETUP INSTRUCTIONS

Follow these steps to assemble your Meliconi Cleaning Tower. Assembly typically takes approximately 10 minutes.

1. **Attach Vertical Column to Base:** Secure the vertical support column to the base plate using the provided screws and Allen key. Ensure the column is firmly seated and stable.
2. **Install Accessory Hooks:** Attach the accessory hooks to the designated slots on the vertical column. Some hooks may require screws for secure fastening.
3. **Mount Dyson Charging Dock:** The original Dyson charging dock (not included) must be mounted onto the vertical column. Align the dock with the pre-drilled holes and secure it using the appropriate screws. Multiple height options may be available to suit different Dyson models.
4. **Route Power Cable:** Guide the Dyson vacuum's power cable through the integrated cable management channel on the back of the vertical column. This keeps the cable tidy and out of sight.
5. **Position the Stand:** Place the assembled Cleaning Tower on a flat, stable surface. The protective rubber feet on the base will prevent floor scratches and enhance stability.

4. OPERATING INSTRUCTIONS

Using the Meliconi Cleaning Tower is straightforward:

- **Charging the Vacuum:** Once the Dyson charging dock is installed, simply place your Dyson vacuum onto the dock. Ensure it clicks into place and begins charging.

- **Storing Accessories:** Hang your Dyson vacuum accessories on the provided hooks. The stand is designed to hold various brush heads and tools, keeping them readily accessible.
- **Moving the Stand:** While the stand is stable, exercise caution when moving it, especially with the vacuum attached. Lift from the base to relocate.

5. MAINTENANCE

To ensure the longevity and appearance of your Cleaning Tower:

- **Cleaning:** Wipe the stand with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish.
- **Inspection:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Avoid Overloading:** Do not exceed the intended capacity for accessories to maintain stability.

6. TROUBLESHOOTING

Issue: Stand feels unstable.

Solution: Ensure all assembly screws are fully tightened. Verify the stand is placed on a flat, level surface. Check that the protective rubber feet are properly installed.

Issue: Dyson vacuum not charging when docked.

Solution: Confirm the Dyson charging dock is correctly installed and securely connected to its power source. Ensure the vacuum is properly seated in the dock. This issue is typically related to the vacuum or its charging dock, not the stand itself.

Issue: Accessories do not fit on hooks.

Solution: Ensure you are using genuine Dyson accessories compatible with your vacuum model. The hooks are designed for standard Dyson attachments. If an accessory is unusually shaped, it may not fit optimally.
