1. INTRODUCTION

Thank you for choosing the UBOTIE Portable Bluetooth Colorful Computer Keyboard. This wireless keyboard combines a unique retro typewriter design with modern functionality, offering a comfortable and efficient typing experience. Its vibrant multi-color keycaps are designed to resist fading, ensuring a lasting aesthetic appeal. This keyboard is ideal for various uses, including everyday tasks, personal projects, education, and business, and is compatible with a wide range of devices.

Key features include:

- **Gorgeous Color Design:** Each keyboard features a distinctive multi-color design with fade-resistant keycaps.
- **Retro Round Keycaps:** Inspired by classic typewriters, providing a unique tactile experience.
- **Wide Compatibility:** Seamlessly connects with Windows, Mac OS, iOS, and Android devices.
- **Stable Bluetooth Connection:** Offers a 10-meter connection range, quick re-connection, and auto-sleep function.
- **Multi-Channel Connectivity:** Supports BT1, BT2, and BT3 channels for simultaneous connection to multiple devices.

2. SETUP

2.1. Battery Installation

The UBOTIE keyboard requires 2 AAA batteries for operation. These are typically included in the package.

1. Locate the battery compartment on the underside of the keyboard.
2. Slide open the battery compartment cover.
3. Insert 2 AAA batteries, ensuring correct polarity (+/-).

4. Close the battery compartment cover securely.

2.2. Bluetooth Pairing

The keyboard supports up to three Bluetooth connections, allowing you to switch between devices easily.

1. Turn on the keyboard using the On/Off switch, usually located on the top right edge.
2. Select a Bluetooth channel (BT1, BT2, or BT3) by holding down the **Fn** key and pressing **1**, **2**, or **3** for 2 seconds. The indicator light will flash, indicating pairing mode.
3. On your device (PC, laptop, tablet, or smartphone), navigate to Bluetooth settings and search for available devices.
4. Select the keyboard's name (e.g., "UBOTIE Keyboard" or similar) from the list to connect.
5. Once connected, the indicator light on the keyboard will stop flashing.

4. MAINTENANCE

4.1. Cleaning the Keyboard

To maintain the keyboard's appearance and functionality, regular cleaning is recommended. The round keycaps can be removed for thorough cleaning.

1. Turn off the keyboard and remove the batteries.
2. Gently pull up on each keycap to remove it. A keycap puller (not included) can be used for easier removal.
3. Use a soft, dry cloth or a small brush to remove dust and debris from the keyboard base and between the switches.
4. Clean the keycaps with a damp cloth and mild soap if necessary, then dry them completely before reattaching.
5. Align each keycap with its corresponding switch and press down firmly until it clicks into place.

4.2. Battery Care

To maximize battery life and prevent issues:

- Use high-quality AAA alkaline batteries.
- Replace both batteries simultaneously when they are depleted.
- If the keyboard will not be used for an extended period, remove the batteries to prevent leakage.
- The keyboard features an auto-sleep function to conserve power when idle.

5. TROUBLESHOOTING

If you encounter issues with your UBOTIE keyboard, please refer to the following common solutions:

5.1. Connectivity Issues

- **Keyboard not connecting:** Ensure the keyboard is turned on and batteries are correctly installed and charged. Re-initiate pairing mode by holding **Fn + 1/2/3** for 2 seconds.
- **Bluetooth not found on device:** Make sure your device's Bluetooth is enabled and discoverable. Try restarting your device's Bluetooth function.
- **Frequent disconnections:** This can sometimes be due to low battery. Replace the batteries. Ensure the keyboard is within the 10-meter Bluetooth range and there are no significant obstructions or strong interference sources (e.g., Wi-Fi routers, other wireless devices).
- **Windows PC connectivity:** If your Windows PC does not have built-in Bluetooth or an older version, you may need a separate Bluetooth adapter (dongle) for stable connection.

5.2. Keys Not Responding

- **Specific keys not working:** Check if any debris is lodged under the keycap. Remove the keycap and clean the area. Re-seat the keycap firmly.
- **All keys not working:** Ensure the keyboard is connected via Bluetooth. Check battery levels and replace if necessary. Try turning the keyboard off and on again.

5.3. Lag or Input Delay

- Ensure your device's operating system is up to date.
- Minimize other active Bluetooth connections on your device.
- Move closer to your device to ensure a strong Bluetooth signal.
