BWLLNI AE-MIRR09-TMM

BWLLNI Hollywood Lighted Makeup Mirror User Manual

Model: AE-MIRR09-TMM

INTRODUCTION

Thank you for choosing the BWLLNI Hollywood Lighted Makeup Mirror. This manual provides essential information for the safe and efficient operation of your new mirror. Please read these instructions thoroughly before use and retain them for future reference.

SETUP

Unpacking

Carefully remove all components from the packaging. Inspect the mirror and accessories for any signs of damage. Retain packaging materials for potential future transport or returns.

Assembly

The BWLLNI Hollywood Lighted Makeup Mirror typically comes pre-assembled. Ensure the mirror is securely seated in its stand before use. No additional tools are required for basic setup.

Power Connection

Locate the power input port on the back of the mirror. Insert the provided power adapter into this port, then plug the adapter into a standard electrical outlet. Ensure the connection is secure.

OPERATING INSTRUCTIONS

Power On/Off

To turn the mirror on or off, gently touch the central power symbol button located on the mirror's surface.

Adjusting Light Color (Temperature)

The mirror offers three distinct light color modes: Day Light, Cool Light, and Warm Light. To cycle through these modes, touch the 'M' (Mode) button on the mirror's surface. The mirror will remember your last selected setting.

Image: The mirror displaying three different light color temperatures: Warm Yellow (4000K), Warm White (5000K), and Cold White (6000K).

Adjusting Brightness

To adjust the brightness of the LED bulbs, press and hold the 'P' (Plus) button on the mirror's surface. The brightness will gradually increase or decrease. Release the button when the desired brightness level is reached. The mirror will retain the last brightness setting.

Using the 10X Magnification Mirror

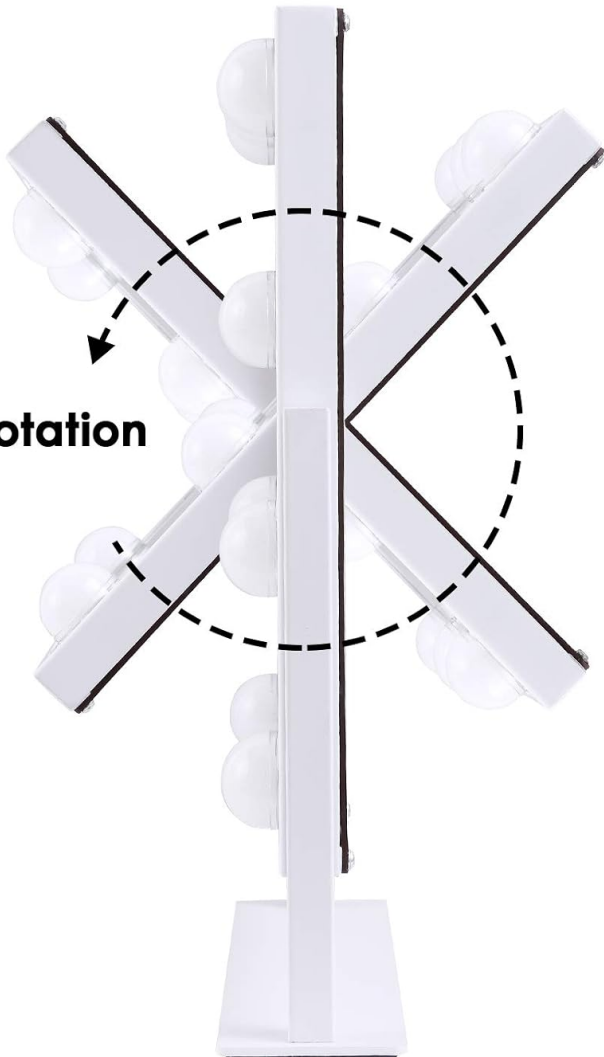

The mirror includes a detachable 10X magnification mirror. This smaller mirror can be attached to any part of the main mirror's surface using its suction cups. This feature is ideal for detailed tasks such as eyeliner application or eyebrow grooming.

Image: The main mirror with the detachable 10X magnifying mirror attached, highlighting its utility for detailed tasks.

Mirror Rotation

The mirror features a 360-degree free rotation capability. Gently adjust the mirror to your preferred angle for optimal viewing. The sturdy base ensures stability at any position.

A diagram of a white, rectangular mirror mounted on a stand. The mirror is shown in a tilted position. A dashed circle with an arrow indicates a 360-degree rotation around a vertical axis. The text "360° Free Rotation" is written to the left of the mirror.

360° Free Rotation

MAINTENANCE

Cleaning the Mirror

To clean the mirror surface, use a soft, lint-free cloth and a non-abrasive glass cleaner. Avoid spraying cleaner directly onto the mirror; instead, apply it to the cloth first. Do not use harsh chemicals or abrasive materials, as these may damage the mirror or its coating.

Bulb Lifespan

The pre-installed LED bulbs are designed for long-term use, with an expected lifespan of up to 50,000 hours. Bulb replacement is generally not required under normal operating conditions.

TROUBLESHOOTING

Lights Not Turning On

- Ensure the power adapter is securely plugged into both the mirror and a functional electrical outlet.
- Verify that the power outlet is active by testing it with another device.
- Press the power button firmly on the mirror's surface.

Lights Flickering

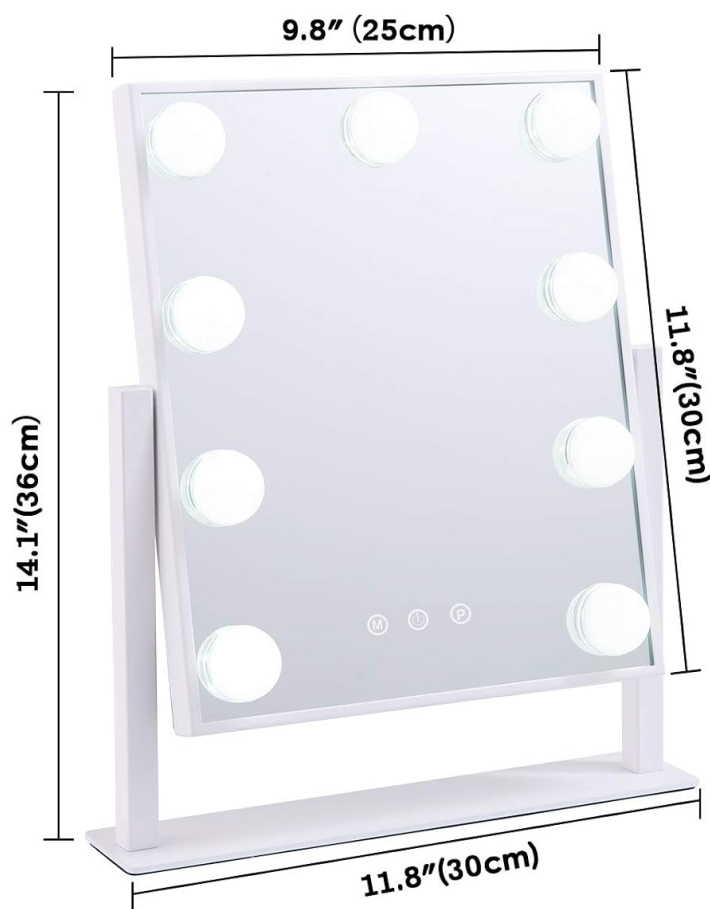

- Check the power connection for any loose contacts.
- Try plugging the mirror into a different electrical outlet.
- If flickering persists, discontinue use and contact customer support.

Touch Controls Unresponsive

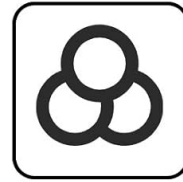

- Ensure the mirror surface is clean and free of moisture or debris that might interfere with touch sensitivity.
- Unplug the mirror from the power source, wait 30 seconds, and then plug it back in to reset the controls.

SPECIFICATIONS

- **Model Number:** AE-MIRR09-TMM
- **Brand:** BWLLNI
