> SteamOne Victor SN250MG Portable Garment Steamer - 2000W, 30g/min Steam Output Instruction Manual

## SteamOne SN250MG

# SteamOne Victor SN250MG Portable Garment Steamer

Instruction Manual

## 1. INTRODUCTION

---

Thank you for choosing the SteamOne Victor SN250MG Portable Garment Steamer. This powerful 2000W device is designed to quickly and effectively remove wrinkles from your garments while sanitizing them with a steam output of 30 g/min. Please read this manual carefully before first use to ensure safe and optimal performance.

## 2. SAFETY INSTRUCTIONS

---

- Always unplug the steamer from the power outlet before filling with water, cleaning, or when not in use.
- Do not immerse the steamer in water or other liquids.
- Keep the steamer out of reach of children and pets.
- Use only distilled or demineralized water to prevent mineral buildup and extend the life of the appliance.
- Do not direct steam towards people, animals, or electrical appliances. Steam is hot and can cause burns.
- Ensure the power cord is not damaged and avoid placing it near hot surfaces.
- Never operate the steamer if it has a damaged cord or plug, or if it has been dropped or damaged.

## 3. PRODUCT OVERVIEW

---

The SteamOne Victor SN250MG is a compact and powerful portable garment steamer designed for ease of use and effective results.

### Key Features:

- **Power:** 2000 Watts for rapid heating and strong steam output.
- **Steam Output:** 30 g/min for effective wrinkle removal and sanitization.

- **Heat-up Time:** Ready to use in just 40 seconds.
- **Water Tank Capacity:** 140 ml removable tank, providing approximately 8 minutes of continuous steaming.
- **Ergonomic Design:** Features an ergonomic trigger and a backlit button for intuitive operation.
- **Compact Size:** Dimensions of 22 x 17.3 x 11.8 cm, making it ideal for travel and easy storage.
- **Bottle Connector:** Includes a universal bottle connector for extended steaming sessions using standard water bottles.

## 4. SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Fill Water Tank:** Remove the 140 ml removable water tank. Fill it with distilled or demineralized water up to the MAX line. Reattach the tank securely to the steamer. Alternatively, use the included bottle connector with a standard water bottle for larger capacity.

3. **Power Connection:** Plug the steamer into a suitable electrical outlet (220-240V).
4. **Pre-heating:** Press the backlit power button. The indicator light will illuminate, and the steamer will begin to heat up. It will be ready in approximately 40 seconds.

## 5. OPERATING INSTRUCTIONS

---

1. **Garment Preparation:** Hang your garment on a hanger. For best results, gently pull the fabric taut with one hand while steaming with the other.
2. **Steaming:** Once the steamer is heated (indicator light stable), press and hold the ergonomic steam trigger to release steam. Move the steam head slowly over the fabric, from top to bottom.

4. **Continuous Steam:** The steamer features a locking steam trigger for continuous steam flow, useful for thicker or larger garments.
5. **Automatic Shut-off:** For safety and energy saving, the steamer is equipped with an automatic shut-off function.
6. **Finishing:** After steaming, allow the garment to cool and dry completely before wearing or storing.

## 6. MAINTENANCE

---

Regular maintenance ensures the longevity and optimal performance of your steamer.

1. **Empty Water Tank:** After each use, unplug the steamer and allow it to cool completely. Remove the water tank and empty any remaining water.
2. **Cleaning the Exterior:** Wipe the exterior of the steamer with a soft, damp cloth. Do not use abrasive cleaners or solvents.
3. **Descaling:** If you notice reduced steam output or mineral residue, descaling may be necessary. Mix equal parts white vinegar and distilled water. Fill the tank with this solution and run the steamer until half the solution is used. Unplug, let it cool, then empty and rinse the tank thoroughly. Repeat with clean distilled water to flush out any vinegar residue. Perform this process monthly or as needed, depending on water hardness.
4. **Storage:** Store the steamer in a cool, dry place, away from direct sunlight and moisture. Ensure the water tank is empty before storage.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
No steam or low steam output	Water tank empty; Steamer not heated; Mineral buildup.	Refill water tank; Wait for 40 seconds until indicator light is stable; Perform descaling procedure.
Water leakage from steam head	Overfilled water tank; Steamer not fully heated; Condensation.	Do not overfill; Wait for full heat-up; This is normal for initial use or if held horizontally.
Steamer not turning on	Not plugged in; Power outlet issue; Damaged cord/plug.	Ensure plug is securely inserted; Test outlet with another appliance; Do not use if damaged, contact support.

## 8. SPECIFICATIONS

Feature	Detail
Brand	SteamOne
Model Number	SN250MG-a
Power	2000 Watts
Heat-up Time	40 Seconds
Steam Output	30 g/min
