HONITURE Q6PRO

HONITURE Q6 Pro Robot Vacuum and Mop Combo User Manual

Model: Q6PRO

INTRODUCTION

This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your HONITURE Q6 Pro Robot Vacuum and Mop Combo. Please read this manual thoroughly before using the product and retain it for future reference.

The HONITURE Q6 Pro Robot Vacuum and Mop Combo in a modern living room setting, showcasing its sleek design and integration into a home environment.

The HONITURE Q6 Pro is designed to provide comprehensive floor cleaning, combining vacuuming, mopping, and sweeping functionalities. Equipped with advanced laser navigation and smart mapping, it ensures efficient and thorough cleaning of your home. The self-emptying station further enhances convenience by automatically disposing of collected dust.

The instruction manual and quick guide are included to assist with product setup and usage.

PRODUCT OVERVIEW

The HONITURE Q6 Pro integrates multiple cleaning technologies for an optimal user experience. Key features include a 4L auto self-emptying station, LDS laser navigation, 4000Pa max suction, and app control.

An overview of the HONITURE Q6 Pro's key features, including its 4L self-emptying capacity, map editing capabilities, 4000Pa suction power, 4.0 LiDAR navigation, 250-minute runtime, and smart app/voice control compatibility.

Components Included:

- Robot Vacuum
- Self-Emptying Station (4L capacity)
- 2-in-1 Water Tank Dust Box
- Mop Holder
- Washable Mops
- Disposable Mops
- Side Brush
- HEAP Filter
- Cleaning Brush
- Instruction Manual
- Quick Guide

The main components of the HONITURE Q6 Pro: the robot vacuum, the self-emptying station, and the 2-in-1 water tank dust box.

SETUP

1. Unboxing and Initial Placement

Carefully remove all components from the packaging. Place the self-emptying station against a wall in an open area, ensuring there are no obstacles within 1.5 meters in front and 0.5 meters on either side. Connect the power cord to the station and plug it into a power outlet.

2. Robot Preparation

- **Install Side Brush:** Attach the side brush to the designated slot on the underside of the robot.
- **Install Mop Holder:** If using the mopping function, attach the mop holder with a clean mop pad to the bottom of the robot.
- **Fill Water Tank:** Open the 2-in-1 water tank dust box, fill the water compartment with clean water (do not use cleaning solutions), and reinsert it into the robot.

3. Initial Charging

Place the robot onto the charging contacts of the self-emptying station. Ensure the robot is properly docked. The LED indicators on the station will show the charging status. Fully charge the robot before its first use (approximately 6 hours).

4. App Connection

Download the HONITURE app from your smartphone's app store. Follow the in-app instructions to connect your robot vacuum to your home Wi-Fi network. This will enable smart mapping, remote control, and advanced cleaning settings.

This video provides instructions on how to use the mobile application to set up exclusion zones for the robot vacuum, preventing it from entering specific areas.

OPERATING INSTRUCTIONS

1. Cleaning Modes

The Q6 Pro supports four cleaning modes:

- **Automatic Cleaning:** The robot intelligently maps and cleans your entire home.
- **Selective Cleaning:** Choose specific rooms or areas to clean via the app.
- **Spot Cleaning:** Direct the robot to clean a concentrated dirty area.

- **Edge Cleaning:** The robot focuses on cleaning along walls and furniture edges.

The HONITURE Q6 Pro demonstrates its 3-in-1 capability, sweeping, vacuuming, and mopping with 4000Pa suction and adjustable water volume.

2. Smart Mapping and Navigation

Equipped with LDS LiDAR navigation and 26 sensors, the Q6 Pro creates a detailed map of your home, avoiding obstacles and planning efficient cleaning routes. It can store up to five maps, ideal for multi-story households.

The robot vacuum utilizes laser navigation to accurately map its surroundings, ensuring comprehensive coverage and obstacle avoidance.

The precise LDS navigation system allows for setting no-go zones and features anti-drop and anti-collision capabilities for safe and effective cleaning.

3. Customizing Cleaning

Through the app, you can customize cleaning methods for different rooms, adjust suction power (up to 4000 Pa) and water volume (three levels), and set cleaning schedules and sequences. You can also define virtual no-go zones and no-mop zones.

The app allows for personalized cleaning settings, including adjusting water volume and suction power for individual rooms, and setting specific cleaning areas.

4. Automatic Recharging

The robot is equipped with a 5200 mAh battery, providing up to 250 minutes of runtime. When the battery is low, the robot will automatically return to the charging station. After recharging, it will resume cleaning from where it left off.

The robot vacuum intelligently navigates back to its charging station when its battery is low, ensuring continuous cleaning cycles.

MAINTENANCE

1. Self-Emptying Station Maintenance

The 4-liter dust collection bag in the self-emptying station needs to be replaced approximately every 70 days, depending on usage. Monitor the LED indicators on the station for alerts regarding dust bag status.

2. Dust Box and Filter Cleaning

Regularly empty the 2-in-1 water tank dust box and clean the HEAP filter. The filter can be washed with water; ensure it is completely dry before reinserting.

Essential maintenance accessories: side brush, HEAP filter, and cleaning brush.

3. Mop Pad Cleaning/Replacement

Washable mop pads should be cleaned after each mopping session. Disposable mop pads should be discarded after use. Replace mop pads regularly to maintain optimal mopping performance.

Mop holder, washable mops, and disposable mops are included for versatile cleaning.

4. Brush Cleaning

Remove and clean the main brush and side brushes regularly to prevent hair entanglement and debris buildup. Use the provided cleaning brush to cut and remove tangled hair.

5. Sensor Cleaning

Wipe the robot's sensors (LDS, anti-drop, anti-collision) with a soft, dry cloth to ensure accurate navigation and obstacle detection.

TROUBLESHOOTING

If your robot vacuum encounters issues, refer to the following common troubleshooting steps:

- **Robot not charging:** Ensure the charging station is powered on and the robot is correctly docked. Clean the charging contacts on both the robot and the station.
- **Poor cleaning performance:** Check and clean the main brush, side brushes, and filters. Ensure the water tank is filled for mopping.
- **Robot gets stuck frequently:** Clear obstacles from the cleaning path. Use the app to set virtual no-go zones for problematic areas.
- **App connectivity issues:** Ensure your Wi-Fi network is stable and the robot is within range. Restart the robot and your router if necessary.
- **Error messages:** Consult the detailed instruction manual for specific error codes and their solutions.

This video provides a step-by-step guide on how to replace the batteries in the robot vacuum, a common troubleshooting step for power-related issues.

SPECIFICATIONS

Feature	Specification
Brand	HONITURE
Model Name	Q6PRO
Max Suction Power	4000 Pa
Navigation System	LDS LiDAR
Sensors	26

Self-Emptying Station Capacity	4 Liters
Battery Capacity	5200 mAh
Run Time	Up to 250 minutes
Control Method	App, Remote, Touch, Voice (Alexa, Google Home)
Cleaning Modes	Automatic, Selective, Spot, Edge
Water Volume Levels	3
Mapping Capability	Up to 5 maps
Product Dimensions	13.7"L x 13.7"W x 3.8"H
Item Weight	7.7 pounds
Filter Type	Cartridge, Sponge
Surface Recommendation	Wooden Floor/ Hard Floor/ Low-piled Carpet/ Ceramic

WARRANTY AND SUPPORT

The HONITURE Q6 Pro Robot Vacuum and Mop Combo comes with a 2-year warranty. For any questions, technical assistance, or after-sales service, please contact HONITURE customer support. We offer 24/7 after-sales service and lifetime technical support.
