## MAINTENANCE

### Water Resistance

The Zeblaze Vibe 3 is rated IP67 waterproof and resistant up to 50 meters. This means it is protected against dust ingress and can withstand immersion in water up to 1 meter for 30 minutes. It is suitable for swimming and daily use, but avoid exposure to hot water, steam, or high-pressure water jets, as this can compromise the seals.

Shockproof

Image: This image demonstrates the IP67 rating, highlighting the watch's resistance to water, dust, and shock. The watch is shown in a rugged environment, emphasizing its durability.

## Cleaning

To clean your smartwatch, wipe it with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners. Ensure the watch is dry before wearing it again, especially after exposure to water.

## Battery Care

The watch uses a CR2450 battery with a capacity of 610mAh. Battery life varies depending on usage:

- Frequent Use: Approximately 18 months
- Normal Use: Approximately 24 months
- Power-Saving Mode: Approximately 33 months

When the battery is low, replace it with a new CR2450 battery. Refer to the product packaging or manufacturer's guidelines for battery replacement instructions.

## IP67 Dust&Waterproof

Backed by an international standard rating of IP67, VIBE 3 wrist watch has waterproof performance high up to 50-meter/164 ft, Hence, no water, dust, or dirt will soak into the smartwatch in daily life or on outdoor trips. For travelers who often encounter heavy rain, mud, and rivers, the impervious VIBE 3 would definitely be your best assistant.

## TROUBLESHOOTING

### Device Not Powering On

- Ensure the battery is correctly installed and has sufficient charge.
- Press and hold the 'START' button (S3) for at least 3 seconds.

### Connectivity Issues (Bluetooth)

- Verify Bluetooth is enabled on both your watch (S1 button) and smartphone.
- Ensure the watch is within the Bluetooth range of your smartphone.
- Restart both your watch and smartphone, then attempt to re-pair through the app.
- Check if the companion app is updated to the latest version.

### Inaccurate Data Readings

- Ensure the watch is worn snugly on your wrist.
- Calibrate the watch through the companion app if available.

- For GPS-related data, ensure your smartphone's GPS is active and the watch is connected to the app.

## Resetting the Device

If you experience persistent issues, you may perform a reset. Press and hold the 'RESET' button (S4) for several seconds. Refer to the app or product support for specific reset procedures if a soft reset does not resolve the issue.
