The paddles are designed to provide a tactile "mouse-click" feel when pressed, ensuring precise and responsive input during gameplay.

MAINTENANCE

To ensure the longevity and optimal performance of your SCUF Elite Series 2 Paddles, follow these maintenance guidelines:

- **Cleaning:** Wipe the paddles with a soft, dry cloth to remove dust and grime. Avoid using abrasive cleaners or

solvents that could damage the stainless steel finish.

- Storage:** When not in use, store the paddles in a clean, dry place. If storing the controller in its charging case, consider removing the paddles to prevent potential damage or interference with charging (see Troubleshooting).
- Handling:** While durable, avoid excessive force or bending of the paddles to maintain their structural integrity and magnetic connection.

TROUBLESHOOTING

Issue: Controller does not charge in the Elite Series 2 charging dock with paddles installed.

Solution: The SCUF Elite Series 2 Paddles are designed for optimal ergonomic performance and may extend beyond the clearance of the Elite Series 2 charging dock. To charge your controller using the charging dock, the paddles must be removed. Alternatively, you can charge your controller directly using a USB-C cable connected to the controller's port.
