## Fantech VX7

# FANTECH CRYPTO VX7 Gaming Mouse User Manual

Model: VX7 | Brand: Fantech

## INTRODUCTION

---

Thank you for choosing the FANTECH CRYPTO VX7 Gaming Mouse. This high-performance optical gaming mouse is designed for precision and durability, featuring an 8,000 DPI optical sensor, 6 programmable buttons, and a lifetime of 10 million clicks. This manual provides detailed instructions to help you set up, operate, and maintain your new gaming mouse.

## SETUP

---

The FANTECH CRYPTO VX7 Gaming Mouse is a plug-and-play device for basic functionality. For advanced features and customization, software installation is required.

### System Requirements:

- Operating System: Windows XP, Linux (for basic functionality)
- Hardware Platform: PC
- Connectivity: USB Port

### Installation Steps:

1. **Connect the Mouse:** Insert the USB connector of the FANTECH CRYPTO VX7 mouse into an available USB port on your computer. The mouse will be automatically detected by your operating system.
2. **Install Software (Optional but Recommended):** To unlock the full potential of your mouse, including programmable buttons and macro functions, download the official FANTECH CRYPTO VX7 software from the

Fantech official website. Follow the on-screen instructions to complete the installation.

3. **Configure Settings:** Once the software is installed, launch it to customize DPI settings, button assignments, lighting effects, and create profiles.

## OPERATING INSTRUCTIONS

---

The FANTECH CRYPTO VX7 offers various features to enhance your gaming and computing experience.

### DPI Adjustment (On-the-Fly)

The mouse features an optical sensor with adjustable DPI from 200 to 8000. You can switch DPI settings instantly to adapt to different gaming scenarios or tasks, from precise sniper targeting (lower DPI) to fast-paced movements (higher DPI).

Figure 2: On-the-Fly DPI Switching. This image displays a white version of the FANTECH CRYPTO VX7 mouse, emphasizing its 8000 DPI capability and the convenience of on-the-fly DPI adjustments for various gaming situations.

### Programmable Buttons (6D Macro Function)

The VX7 is equipped with 6 programmable buttons. Using the dedicated software, you can assign macros, key functions, or multimedia controls to these buttons. The software supports saving up to 3 profiles and allows for left-

click button script and delay editing.

# 6D

## MACRO FUNCTION PERFORMANCE

Fantech CRYPTO VX7 designed with 6 programmable buttons for your macro assignment with its software which can save up to 3 profiles and support left-click button script and delay editing.

Figure 3: 6D Macro Function Performance. This image shows a side-angle view of the FANTECH CRYPTO VX7 mouse, illustrating its design and the concept of 6 programmable buttons for macro assignments.

### Lighting Effects

The FANTECH CRYPTO VX7 features RGB 4-color lighting. You can customize the lighting effects through the software to match your setup or mood.

# LIGHTING EFFECT

Fantech CRYPTO VX7 designed with 4 lighting colors.

Figure 4: Lighting Effect. This image displays four FANTECH CRYPTO VX7 mice, each showcasing a different lighting color (red, purple, cyan, pink), demonstrating the customizable RGB lighting effects.

## Ambidextrous Design

The CRYPTO VX7 is designed to be ambidextrous, making it suitable for both left-handed and right-handed users. Its ergonomic shape supports both claw grip and palm grip styles.

# AMBIDEXTROUS DESIGN

CRYPTO VX7 with ambidextrous design perfect for left and right hand user

Figure 5: Ambidextrous Design. This image shows two hands demonstrating different grip styles (claw grip and palm grip) on the FANTECH CRYPTO VX7 mouse, highlighting its suitability for both left and right-handed users.

## Durability

Equipped with switches rated for 10 million clicks lifetime, the VX7 is built for extreme durability, ensuring quick and hyper-responsive performance even under intense use.

# 10M

SWITCH MADE FOR DURABILITY

Equipped with 10 million clicks lifetime switches made for extra durability even for extreme using condition while ensuring they stay quick and hyper-responsive.

Figure 6: 10 Million Click Lifetime. This image focuses on the top part of the FANTECH CRYPTO VX7 mouse, emphasizing its robust switches designed for a 10 million click lifetime, ensuring long-term durability.

## MAINTENANCE

---

Proper maintenance will extend the lifespan of your FANTECH CRYPTO VX7 Gaming Mouse.

- **Cleaning:** Use a soft, dry cloth to wipe down the mouse. For stubborn dirt, slightly dampen the cloth with water or a mild cleaning solution. Avoid using harsh chemicals or abrasive materials.
- **Sensor Care:** Keep the optical sensor on the underside of the mouse clean and free of dust or debris to ensure accurate tracking.
- **Cable Management:** Avoid sharp bends or excessive pulling on the 1.8m nylon braided cable to prevent damage.
- **Storage:** When not in use, store the mouse in a clean, dry environment away from extreme temperatures.

## TROUBLESHOOTING

---

If you encounter issues with your FANTECH CRYPTO VX7 Gaming Mouse, refer to the following common solutions:

Problem	Possible Cause	Solution
Mouse not responding	Loose USB connection, faulty USB port, driver issue.	Ensure the USB cable is securely plugged into a working USB port. Try a different USB port on your computer. Restart your computer. Check Device Manager for driver issues and reinstall if necessary.
Inaccurate tracking or erratic cursor movement	Dirty optical sensor, unsuitable mouse pad surface, high DPI setting for current task.	Clean the optical sensor on the underside of the mouse. Use a clean, uniform mouse pad surface. Adjust DPI settings to a lower value if precision is required.
Programmable buttons not working	Software not installed or configured correctly, software conflict.	Ensure the Fantech software is installed and running. Verify button assignments within the software. Update the mouse software to the latest version.
LED lighting not working or incorrect color	Software settings, power issue.	Check lighting settings in the Fantech software. Ensure the mouse is receiving sufficient power (try a different USB port).
