## 2. Safety Information

---

**WARNING: Risk of Electric Shock. Always shut off power to the circuit at the main electrical panel and use a voltage tester to confirm the power is off before beginning any installation, maintenance, or bulb replacement procedures. Failure to do so may result in serious injury or death.**

- Ensure all electrical connections comply with local codes and ordinances, as well as the National Electric Code (NEC).
- If you are unsure about wiring or installation, consult a qualified licensed electrician.
- Do not exceed the maximum wattage specified for the bulbs (Max 100W per socket).
- This fixture is designed for indoor use only and is suitable for damp locations. Do not install in areas with direct water exposure.
- Handle glass shades with care to prevent breakage.

## 5. Installation Guide

Installation should be performed by individuals with full electrical knowledge and previous experience. Refer to the included Instruction Kits for detailed diagrams. For a comprehensive guide, you may also refer to the [Installation Manual \(PDF\)](#).

### Tools Required (Not Included):

- Screwdriver (Phillips and Flathead)
- Wire Strippers
- Pliers
- Electrical Tape
- Voltage Tester
- Safety Glasses

### Installation Steps:

1. **SAFETY FIRST:** Before starting, ensure the power to the light fixture's circuit is turned off at the circuit breaker or fuse box. Use a voltage tester to confirm that the power is completely off at the wall box.
2. **Attach the Mounting Plate:** Secure the mounting plate to the electrical junction box in the wall using the provided screws. Ensure it is firmly attached and level.
3. **Hardwire the Light Fixture:** Connect the electrical wires from the fixture to the corresponding wires in the junction box. Typically, connect the black wire (live) from the fixture to the black wire from the wall, the white wire (neutral) from the fixture to the white wire from the wall, and the green or bare copper wire (ground) from the fixture to the ground wire from the wall. Use wire nuts to secure connections and wrap with electrical tape for added safety.
4. **Tighten the Fixture:** Carefully align the fixture body with the mounting plate and secure it using the provided screws or nuts. Ensure the fixture is flush against the wall and stable.
5. **Install Glass Shades and Bulbs:** Gently attach the glass shades to the fixture. Insert E26 base bulbs (Max 100W, not included) into each socket.
6. **Restore Power:** Once installation is complete and all connections are secure, turn the power back on at the main electrical panel. Test the light fixture.

The wall sconces can be installed to point upwards or downwards, depending on your desired aesthetic and lighting direction.

## 6. Operation

---

Your Hamilyeah Bathroom Vanity Light Fixture is designed for straightforward operation.

### Turning On/Off:

Control the light fixture using your standard wall switch connected to the circuit. Ensure the switch is in the 'ON' position for the fixture to receive power.

### Dimmable Functionality:

This fixture is dimmable, allowing you to adjust the brightness to suit your needs and create different ambiances. To utilize the dimmable feature, you must use:

- **Dimmable E26 Bulbs:** Ensure the bulbs you install are explicitly rated as dimmable.
- **Compatible Dimmer Switch:** A dimmer switch (not included) must be installed on the wall circuit controlling the fixture. Consult a qualified electrician for dimmer switch installation if needed.

## 7. Care and Maintenance

---

Regular care will help maintain the appearance and functionality of your light fixture.

### Cleaning:

- Always turn off the power to the fixture and allow it to cool before cleaning.
- Wipe the metal parts with a soft, dry cloth. Avoid abrasive cleaners, solvents, or polishes as they may damage the finish.
- The glass shades can be cleaned with a soft cloth dampened with water or a mild glass cleaner. Dry thoroughly.

### Bulb Replacement:

- Ensure the power is off and the bulbs have cooled before attempting to replace them.

- Unscrew the old E26 bulb counter-clockwise.
- Screw in the new E26 bulb clockwise, ensuring it is rated for a maximum of 100W.
- Only use bulbs with an E26 base.

## 8. Troubleshooting

If you encounter issues with your light fixture, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Light does not turn on	No power to the fixture Loose wiring connection Faulty bulb	Check circuit breaker/fuse. Ensure wall switch is ON. Turn off power, check wire connections at fixture and junction box. Replace bulb with a known working one.
Light flickers	Loose bulb Incompatible dimmer/bulb Loose wiring	Tighten bulb. Ensure dimmable bulbs are used with a compatible dimmer switch. Turn off power, check wire connections.
Bulbs burn out quickly	Incorrect bulb wattage Poor quality bulbs Voltage fluctuations	Ensure bulbs do not exceed 100W. Use high-quality bulbs. Consult an electrician if voltage issues are suspected.
Fixture finish appears dull or discolored	Improper cleaning agents Environmental factors	Use only a soft, dry cloth for cleaning. Avoid harsh chemicals. Ensure fixture is used in appropriate indoor, damp-rated environments.

If the problem persists after attempting these solutions, please contact Hamilyeah customer support.
