Setup and Assembly

Assembly of the VASAGLE Buffet Cabinet is required. Please refer to the detailed instructions and assembly kit included in your package. It is recommended to lay out all components before beginning assembly to ensure all parts are present. Once assembled, use the provided anti-tip kit to secure the cabinet to a wall for enhanced safety, especially in households with children or pets.

Adjustable Feet

The cabinet is equipped with adjustable feet on each steel leg. These can be rotated to level the cabinet on uneven floors, preventing wobbling and ensuring stability for items placed on or within the unit.

Operation

Sliding Barn Door

The barn door slides smoothly along its track, allowing you to cover either the left or right storage compartments. This feature provides flexibility for displaying or concealing items as needed. To operate, gently slide the door horizontally along the top rail.

Drawer Use

The top drawer provides enclosed storage. Pull the knob to open and push to close. Ensure the drawer is not overloaded to maintain smooth operation and prevent damage.

Adjustable Shelves

The two interior shelves can be adjusted to three different height positions. To adjust, remove the shelf, reposition the support pins to the desired height, and then place the shelf back onto the pins. This allows for accommodating items of various sizes.

Maintenance

To maintain the appearance and longevity of your VASAGLE Buffet Cabinet, wipe surfaces with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish. Regularly check all screws and fittings to ensure they remain tight.

Troubleshooting

- **Wobbling Cabinet:** If the cabinet is unstable, adjust the leveling feet located at the bottom of each leg until the unit is stable.
- **Sticking Drawer/Door:** Ensure the drawer is not overloaded. Check the sliding mechanism for any obstructions or

debris. If necessary, lightly lubricate the door track.

- **Loose Parts:** Periodically check and tighten all screws and fasteners to maintain structural integrity. Do not overtighten.
