The top panel includes power, back, OK, and volume control buttons for direct operation.

3.2 Input/Output Ports

The rear panel of the projector provides a range of ports for connecting external devices:

- **HDMI Ports (x2):** For connecting high-definition sources like laptops, gaming consoles (PS3/PS4, Xbox), and TV boxes.
- **USB Ports (x2):** For connecting USB drives to play media files directly.
- **AV Port:** For connecting older devices using an RCA cable (video, left audio, right audio).
- **Audio Out:** For connecting external speakers or headphones.
- **Power Input:** For connecting the power cable.

4. SETUP

4.1 Placement

Position the projector on a stable, flat surface or mount it to the ceiling. Ensure there is adequate ventilation around the unit. The optimal projection distance for an 80-120 inch screen is typically 9-13 feet (2.4-3.0 meters).

4.2 Power Connection

Connect the provided power cable to the projector's power input port and then plug it into a power outlet.

4.3 Connecting Devices

Connect your desired media source to the projector using the appropriate cable:

- **HDMI:** Use an HDMI cable to connect devices like laptops, TV boxes, gaming consoles, or Fire TV sticks.
- **USB:** Insert a USB flash drive into one of the USB ports for direct media playback.
- **AV:** Use the RCA cable for devices with AV output.

5. OPERATION

5.1 Power On/Off

Press the power button on the projector or the remote control to turn the unit on or off.

5.2 Focus and Keystone Adjustment

To achieve a clear and rectangular image, slowly rotate the focus lens on the projector until the image is sharp. Adjust the keystone correction (if available via a slider or menu) to correct any trapezoidal distortion.

5.3 Wireless Screen Mirroring (iOS/Android)

The WiMiUS S6 supports wireless screen mirroring for iOS and Android devices. Follow the on-screen instructions to connect your smartphone or tablet to the projector's WiFi network and initiate screen mirroring. *Note: Due to copyright restrictions, direct mirroring of Netflix, Hulu, or YouTube apps from mobile devices is not supported. These apps can be viewed by connecting a laptop, MacBook, or Fire TV stick via HDMI.*

5.4 Bluetooth Audio Connection

Connect external Bluetooth speakers or headphones for enhanced audio. Navigate to the Bluetooth settings in the projector's menu, enable Bluetooth, and pair with your desired audio device. *Note: Only wireless connection with Bluetooth*

speakers and headphones is supported; not compatible with smartphones.

Upgrade Bluetooth 5.0 Function

1. Only support wireless connection with bluetooth speakers, headphone, Apple earbuds, not compatible with smartphone.
2. Due to the copyright, it doesn't support JBL speakers!

5.5 Media Playback

Select the appropriate input source (HDMI1, HDMI2, USB, AV) from the projector's menu to display content from your connected device.

6. MAINTENANCE

6.1 Lens Cleaning

Use the provided lens cleaning cloth or a soft, lint-free cloth to gently wipe the projector lens. Avoid using abrasive cleaners or harsh chemicals.

6.2 Dust Removal

To prevent dust accumulation, keep the projector covered when not in use. For internal dust or black spots on the screen,

open the bottom cover and use a cotton swab to carefully clean the internal components.

7. TROUBLESHOOTING

If you encounter issues with your WiMiUS S6 projector, refer to the following common solutions:

- **No Image/Poor Focus:** Ensure the lens cover is removed. Slowly rotate the focus lens to adjust for a clear picture. Check the projection distance.
- **Image is Trapezoidal:** Adjust the keystone correction feature (either via a physical slider or through the projector's menu) to make the image rectangular.
- **No Sound:** Check the volume settings on both the projector and the connected device. Ensure external speakers are properly connected or Bluetooth audio is paired correctly.
- **Cannot Play Netflix/Hulu/YouTube Directly from Phone:** Due to copyright restrictions, these apps cannot be mirrored directly from mobile devices. Connect a laptop, MacBook, or Fire TV stick via HDMI to view content from these platforms.
- **Black Spots on Screen:** This may indicate internal dust. Open the bottom cover of the projector and gently clean the internal components with a cotton swab to remove dust particles.
- **4K Resolution Not Supported:** The projector supports up to 1080P resolution. While it may accept 4K input, it will downscale the content to its native 1080P resolution.
