Gardena Wall-Mounted Hose Box Rollup M 20 m User Manual

Model: 18610-20

PRODUCT OVERVIEW

The GARDENA 20m Wall-Mounted Hose Box RollUp M is designed for flexible and convenient watering of medium-sized gardens. It features integrated RollControl for safe and stable hose retraction, a hose guide to prevent kinking, and a practical wall bracket that swivels up to 180°. The hose box is leak-free, frost-resistant, and UV-resistant, ensuring durability. It comes as a ready-to-use set, including a 20m Gardena high-quality hose, connecting hose, nozzle, and mounting accessories.

SETUP AND INSTALLATION

The Gardena Wall-Mounted Hose Box is designed for easy installation. Follow these steps to set up your hose box:

1. **Choose Location:** Select a suitable wall for mounting, ensuring it is sturdy enough to support the hose box when full of water. Consider proximity to a water tap.
2. **Mount the Wall Bracket:** Use the provided wall bracket, screws, and plugs to securely attach the bracket to the chosen wall. A mounting aid is included to assist with this process. Ensure the bracket is level and firmly fixed.
3. **Attach Hose Box:** Slide the hose box onto the mounted wall bracket. The design allows for easy attachment and removal for winter storage.
4. **Connect to Water Supply:** Use the included connecting hose to link the hose box to your outdoor water tap. Ensure all connections are tight to prevent leaks.
5. **Prepare Nozzle:** The hose comes with a pre-attached nozzle. Ensure it is securely fastened to the end of the hose.

OPERATING INSTRUCTIONS

The Gardena Wall-Mounted Hose Box is designed for effortless watering with its automatic features.

- **Extending the Hose:** Gently pull the hose out to the desired length. The hose will automatically lock into place at short intervals, allowing you to stop at any point without the hose retracting.
- **Swivel Function:** The wall bracket allows the hose box to swivel up to 180°, providing flexibility and reach for watering different areas of your garden without kinking the hose.
- **Retracting the Hose (RollControl):** To retract the hose, give it a short, firm tug. The integrated RollControl technology will then automatically and safely rewind the hose at a controlled speed, preventing tangles and damage.
- **Using the Nozzle:** The included nozzle provides various spray patterns for different watering needs. Adjust the nozzle head to switch between a wide spray and a narrow stream.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your Gardena Wall-Mounted Hose Box.

- **Cleaning:** Periodically wipe down the exterior of the hose box with a damp cloth to remove dirt and debris.
- **Frost Protection:** Although the hose box is frost-resistant, it is recommended to disconnect it from the water supply and drain any remaining water from the hose and unit before the first frost. For prolonged freezing temperatures, detach the hose box from its wall bracket and store it in a frost-free environment.
- **UV Protection:** The materials used are UV-resistant, but storing the unit in a shaded area when not in use can further extend its lifespan.
- **Hose Inspection:** Regularly inspect the hose for any signs of wear, cracks, or damage. Replace the hose if necessary to maintain optimal water flow and prevent leaks.

TROUBLESHOOTING

If you encounter any issues with your Gardena Wall-Mounted Hose Box, consider the following common solutions:

- **Hose Not Retracting:** Ensure the hose is fully extended and then give it a sharp, firm tug to activate the RollControl mechanism. Check for any obstructions in the hose guide.

- **Low Water Pressure:** Verify that the water tap is fully open. Check for kinks or blockages in the connecting hose or the main hose. Ensure all connections are secure.
- **Leaks:** Inspect all connections (tap, connecting hose, nozzle) for tightness. Check the hose itself for any punctures or damage.
- **Hose Kinking:** Ensure the hose is pulled out straight and not at extreme angles. The swivel function of the wall bracket should help minimize kinking during use.

For persistent issues, please refer to the Warranty & Support section for contact information.

SPECIFICATIONS

Brand	Gardena
Model Number	18610-20
Style	Wall-Mounted Hose Box
Color	Turquoise
Material	Plastic
Hose Length	20 meters (65.6 ft)
Hose Diameter	11 mm (0.4 inches)
Item Weight	8300 Grams (18.3 pounds)
Installation Type	Wall Mount
Operation Mode	Automatic (RollControl)
Included Components	1x Wall-Mounted Hose Box RollUp, 1x 20m high-quality hose (11mm), 1x connecting hose, 1x nozzle, 1x wall bracket with screws, plugs and mounting aid.
