## TROUBLESHOOTING

Issue	Possible Solution
Wheel not recognized by Xbox 360.	Ensure the USB cable is securely plugged into the console. Try a different USB port. Restart the Xbox 360 console.
Pedals are slipping on the floor.	Place the pedal set against a wall or a sturdy object. Use a non-slip mat or carpet underneath the pedals.
Wheel feels loose or unstable on the table.	Tighten the clamping screw mechanism. Ensure the table surface is flat and the thickness is within the clamp's range.
