CANMEIJIA Modern Wall Sconce (Model BDA-145-148) Instruction Manual

Model: BDA-145-148

Introduction

Thank you for choosing the CANMEIJIA Modern Wall Sconce. This manual provides essential information for the safe installation, operation, and maintenance of your new lighting fixture. Please read these instructions carefully before installation and retain them for future reference.
This modern wall sconce features a sleek, low-profile design with a plastic shell for good light transmission and durability. The acrylic transparent lampshade ensures soft, comfortable light output. It is designed for indoor use, providing 12W of 3000K warm light.

Safety Information

- **WARNING:** Always disconnect the power supply at the circuit breaker before beginning any installation, maintenance, or cleaning procedures.
- Installation should be performed by a qualified electrician or a person with adequate knowledge of electrical wiring.
- Ensure the mounting surface can support the weight of the fixture.
- Do not connect this fixture to an ungrounded electrical system.
- Do not attempt to modify the fixture in any way. Any modifications may void the warranty and create a safety hazard.
- Keep flammable materials away from the light fixture when in operation.

Setup and Installation

Follow these steps for proper installation. Ensure power is disconnected before starting.

1. **Prepare the Mounting Surface:** Choose a suitable location on the wall. Use the lamp body bracket as a template to mark the drilling points for the screws.
2. **Drill Holes and Install Anchors:** Drill holes at the marked points. Insert the provided wall anchors into the drilled holes if necessary.
3. **Secure the Mounting Bracket:** Align the lamp body bracket with the drilled holes and secure it to the wall using the provided screws. Ensure it is firmly attached.
4. **Connect Wiring:** Carefully connect the electrical wires from the wall to the fixture's wires. Typically, this involves connecting live to live, neutral to neutral, and ground to ground (if applicable). Use appropriate wire connectors.
5. **Mount the Lamp Body:** Align the wall sconce fixture with the secured mounting bracket. Gently push the fixture onto the bracket until it clicks or slides into place.
6. **Tighten Screws:** Secure the lamp body to the bracket using the remaining screws, ensuring the fixture is stable and flush against the wall.

Operating Instructions

Once the wall sconce is securely installed and wired, restore power at the circuit breaker. The light can then be operated using a standard wall switch connected to the fixture's circuit. The product specifications mention 'App Control Method'; however, no specific app or detailed instructions for app control are provided with this product information. If app control is desired, please refer to the product packaging or manufacturer's website for compatible applications and setup guides.

Maintenance

To ensure the longevity and optimal performance of your wall sconce, follow these maintenance guidelines:

- **Cleaning:** Disconnect power before cleaning. Use a soft, dry, or slightly damp cloth to wipe the surface of the fixture. Avoid abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish or acrylic lampshade.
- **Inspection:** Periodically check the fixture for any signs of damage, loose connections, or wear. If any issues are found, disconnect power and consult a qualified electrician.
- **LED Lifespan:** The integrated LED light source is designed for long-term use and is non-removable. If the LED fails, the entire fixture may need replacement.

Troubleshooting

If you encounter issues with your wall sconce, try the following troubleshooting steps:

- **Light Does Not Turn On:**
  - Check if the power supply at the circuit breaker is on.
  - Ensure the wall switch is in the 'ON' position.
  - Verify that the wiring connections are secure and correct (power off before checking).
  - Confirm that the fixture is receiving the correct voltage (110V AC).
- **Light Flickers:**
  - Check for loose wiring connections (power off before checking).
  - Ensure the power supply is stable.
- **Dim Light Output:**
  - Ensure the fixture is clean and free of dust or debris on the lampshade.
  - Verify the power supply is stable.

If these steps do not resolve the issue, please contact customer support.
