5. OPERATING AND POSING

The S.H.Figuarts line is known for its extensive articulation, allowing for a wide range of dynamic poses. Move joints slowly and deliberately to achieve desired positions.

- **Joint Movement:** The figure features multiple points of articulation in the neck, shoulders, elbows, wrists, torso, hips, knees, and ankles.
- **Dynamic Posing:** Utilize the various optional hands and expression parts to recreate iconic scenes and poses from the Jujutsu Kaisen series.
- **Stability:** For complex or airborne poses, consider using a compatible display stand (sold separately) to ensure stability and prevent falls.

6. MAINTENANCE AND CARE

Proper care will ensure the longevity and appearance of your S.H.Figuarts figure.

- **Cleaning:** Use a soft, dry cloth to gently wipe away dust. For stubborn dirt, a slightly damp cloth can be used, but avoid harsh chemicals or abrasive materials.
- **Storage:** Store the figure away from direct sunlight, high humidity, and extreme temperatures. Keep it in its original packaging or a display case to protect it from dust and damage.
- **Joint Care:** If joints become stiff, apply a very small amount of silicone-based lubricant (not oil-based) to the joint. If joints become loose, they may require tightening or replacement parts, which are not typically provided.

7. TROUBLESHOOTING

If you encounter any issues with your figure, please refer to the following common solutions:

Problem	Solution
Loose Joints	Carefully inspect the joint. If it's a peg-and-hole connection, ensure it's fully inserted. For ball joints, a thin layer of clear nail polish or super glue (applied and allowed to dry completely before reassembly) can sometimes add friction.
Stiff Joints	Gently warm the joint with a hairdryer on a low setting for a few seconds (do not overheat) or immerse in warm water to soften the plastic before attempting to move.
Parts Not Fitting	Ensure you are using the correct parts as indicated in the "What's in the Box" section. Check for any molding flash or debris that might obstruct the connection and carefully remove it if present.
