### Step-by-Step Assembly

1. **Attach Headboard Legs:** Secure the metal support legs to the upholstered headboard using the provided bolts and Allen wrench. Ensure they are firmly attached.
2. **Assemble Side Rails:** Connect the two sections of each side rail using the metal plates and bolts. The velcro strips should face inwards.
3. **Connect Headboard and Footboard to Side Rails:** Attach the assembled side rails to the headboard and footboard using the appropriate hardware. Ensure all connections are tight.
4. **Install Center Support Beam:** Position the center support beam along the middle of the bed frame. Attach the adjustable support legs to the beam and adjust their height so they firmly touch the floor.

## Troubleshooting

- **Squeaking Noises:** Ensure all bolts are securely tightened. Loose connections are the most common cause of squeaking. Check the center support legs to ensure they are firmly touching the floor.
- **Bed Frame Feels Unstable:** Verify that the bed frame is on a level surface. Re-check all connections and ensure they are fully tightened. Adjust the center support legs if necessary.
- **Slats Shifting:** Ensure the velcro strips on the slats are properly aligned and pressed firmly onto the corresponding velcro on the side rails.
- **Missing Parts:** If any parts are missing upon arrival, please refer to the 'Package Contents' section and contact LIKIMIO customer support with your purchase details.
