TROUBLESHOOTING

Most issues with your artificial Christmas tree can be resolved with simple adjustments.

Problem	Solution
---------	----------

Problem	Solution
Tree appears sparse or not full.	Ensure all branches are fully fanned out and shaped. Take time to adjust each individual branch for maximum fullness.
Tree is wobbly or unstable.	Check that the tree stand is fully opened and locked into position. Ensure the bottom tree section is securely inserted into the stand. Place the tree on a flat, even surface.
Branches are difficult to bend.	Apply gentle, consistent pressure. The branches are designed to be flexible but may require some effort initially. Avoid excessive force to prevent damage.
