3. SETUP

1. **Unpacking:** Carefully remove the kettle and all accessories from the packaging. Retain packaging for future storage or transport.
2. **Initial Cleaning:** Before first use, fill the kettle with clean water to the maximum fill line. Boil the water, then discard it. Repeat this process 2-3 times to remove any manufacturing residues.
3. **Placement:** Place the power base on a stable, flat, and dry surface, away from heat sources and direct sunlight. Ensure the power cord is not dangling to prevent accidental pulling.
4. **Power Connection:** Plug the power cord into a suitable electrical outlet.

4. OPERATING INSTRUCTIONS

1. **Filling the Kettle:** Open the lid and fill the kettle with fresh water. Do not fill below the minimum mark or above the maximum (1.7L) mark. Close the lid securely.
2. **Placing on Base:** Place the kettle firmly onto its power base.

3. Selecting Temperature/Boiling:

- **Boil Water:** Press the right button on the base to initiate boiling to 1000C. The LED display will show the current temperature as it heats up.
 - **Temperature Control (Keep Warm):** Use the rotary knob on the base to select your desired temperature (e.g., 600C for tea, 900C for coffee). Press the left button to activate the keep-warm function, maintaining the selected temperature for up to 24 hours.
4. **Smart App Control:** The kettle can be controlled via the Xiaomi Home app. Ensure your app region is set to China to find the Kettle Pro 2. Through the app, you can set precise temperatures, schedule boiling times, and monitor the kettle's status.
5. **Pouring:** Once the desired temperature is reached or boiling is complete, carefully lift the kettle from the base and pour. The ergonomic handle ensures comfortable and safe pouring.

5. MAINTENANCE AND CLEANING

Regular cleaning and maintenance will prolong the life of your kettle and ensure optimal performance.

- **Exterior Cleaning:** Wipe the exterior of the kettle and the power base with a soft, damp cloth. Do not use abrasive cleaners or harsh chemicals.
- **Interior Cleaning:** The stainless steel interior can be cleaned by hand. Do not immerse the kettle or its base in water.
- **Descaling:** Over time, mineral deposits (limescale) may build up inside the kettle, especially in hard water areas. To descale, fill the kettle with a mixture of water and white vinegar (1:1 ratio) or a commercial descaling solution. Boil the mixture, then let it sit for 30 minutes to an hour (or as per descaler instructions). Empty the kettle and rinse thoroughly several times with fresh water.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Kettle does not turn on.	Not plugged in; power outlet issue; kettle not properly seated on base.	Ensure kettle is plugged in and power outlet is functional. Re-seat kettle firmly on the base.
Water not heating.	Insufficient water; dry-burn protection activated.	Ensure water level is above minimum. If dry-burn activated, remove kettle, let cool, then refill and restart.
LED display not working.	Power issue; internal fault.	Check power connection. If issue persists, contact customer support.
Excessive noise during boiling.	Limescale buildup.	Descal the kettle as per maintenance instructions.
