Beurer BR60

Beurer BR60 Insect Bite Healer User Manual

Model: BR60 | Brand: Beurer

Introduction

The Beurer BR60 Insect Bite Healer is designed to provide chemical-free relief from itching and swelling caused by insect bites and stings. Utilizing a ceramic heat plate, it applies targeted heat to the affected area, helping to alleviate symptoms naturally. This compact and portable device is suitable for various outdoor activities and is safe for use by pregnant women and children under adult supervision.

Key Features

- **Symptom Relief:** Helps combat itching and swelling after insect bites by using heat to accelerate the healing process – insect bite relief from mosquitos, wasps, bugs, and bees.
- **Chemical-Free:** Non-toxic and safe to use, the insect bite pen only uses heat and is suitable for pregnant women, allowing you to avoid chemical products like bug bite creams or bug sprays.
- **Fast and Effective:** The quick-warming ceramic plate is ready for use almost immediately and application takes just 3-6 seconds, depending on which of the 2 programs you've chosen – suitable for all ages and sensitive skin.
- **Easy to Use:** Place the bug bite pen on the affected area, then press the button and wait 3-6 seconds until you hear the beep and the heating stops – super simple and easy to use.
- **Portable Design:** The bug bite healer is battery-operated, compact, and lightweight, making it an ideal accessory for travel, camping, and other outdoor activities – ready whenever you need it.

Safety Information

Please read all instructions before use. This device applies heat to the skin. While designed to be safe, improper use may cause discomfort or minor skin irritation. Always follow the recommended application times.

- Do not use on open wounds, irritated skin, or areas with skin conditions.
- Avoid prolonged contact with the skin beyond the recommended treatment time.
- Keep out of reach of small children. For children aged 3 and above, use only under direct adult supervision. Self-application is recommended for ages 12 and above.
- If you experience excessive pain, redness, or blistering, discontinue use immediately and consult a medical professional.
- Do not immerse the device in water or other liquids.

- Use only the specified battery type and ensure correct polarity.

Image: The Beurer BR60 is safe for children aged 3 and up with adult supervision, and for self-application by those 12 and older.

Setup

Battery Installation

1. Locate the battery compartment cover on the device.
2. Gently slide or unclip the cover to open the compartment.
3. Insert the required batteries (typically 2x AAA, check device markings for exact type) ensuring correct polarity (+/-) as indicated inside the compartment.
4. Close the battery compartment cover securely until it clicks into place.

Image: The Beurer BR60 is lightweight and portable, with its battery compartment located at the base.

Operating Instructions

Using Your BR60 Insect Bite Healer

1. **Identify the Bite:** Locate the insect bite or sting on your skin. For best results, use the device immediately after a bite.
2. **Turn On:** Switch on the BR60 using the side switch.
3. **Position the Device:** Place the BR60's ceramic heat plate directly onto the sting or bite on the skin.
4. **Select Program:** Press the button to choose your treatment program:
    - Press once for **3 seconds** of heat (sensitive skin setting).
    - Press twice for **6 seconds** of heat (normal skin setting).
5. **Treatment:** The treatment will start automatically. Hold the device firmly in place. An acoustic signal (beep) will indicate

the end of the treatment.

6. **Turn Off:** Turn the device off with the side switch after use to conserve battery life.

Image: The BR60 operates at an optimal temperature of 122°F (50°C) for effective and safe treatment.

Maintenance

Cleaning and Storage

- After each use, wipe the ceramic heat plate with a clean, dry cloth.
- Do not use abrasive cleaners or harsh chemicals.
- Store the device in a cool, dry place, away from direct sunlight and extreme temperatures.
- If the device will not be used for an extended period, remove the batteries to prevent leakage.

Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Device does not turn on.	Batteries are dead or incorrectly inserted.	Check battery polarity and replace batteries if necessary.
Device heats up but does not alleviate itching.	Application time too short or bite is severe.	Ensure you are using the 6-second setting for normal skin. Reapply if needed, but do not exceed recommended usage. Consult a medical professional if symptoms persist.
Device feels too hot or causes discomfort.	Sensitive skin or incorrect setting.	Use the 3-second setting for sensitive skin. Discontinue use if discomfort persists.
