## Aivituvin Extra Large

# Aivituvin Cat House Outdoor Catio Instruction Manual

Model: Extra Large (ASIN: B08MTNHCDD)

Brand: Aivituvin

## 1. INTRODUCTION AND OVERVIEW

The Aivituvin Cat House Outdoor Catio is a spacious and secure enclosure designed to provide a safe and stimulating outdoor environment for your feline companions. Constructed from durable wood and sturdy metal wire, this catio offers multiple levels for climbing, playing, and relaxation, along with comfortable sleeping areas. Its thoughtful design ensures both the safety and comfort of your pets while allowing them to enjoy the fresh air and surroundings.

## 2. KEY FEATURES

This catio is equipped with several features designed for optimal pet comfort and owner convenience:

- **Multiple Platforms:** Unique upgraded extra middle platform and enlarged six side shelves allow cats to jump from left to right, providing kittens with more climbing space.
- **Walk-In Style Door:** An oversized convenient front door, measuring 67 inches in height, includes a safety latch. This allows adult individuals to easily access the cat enclosure for interaction with pets and simplifies cleaning tasks.
- **Two Sleeping Houses:** The fully enclosed catio features two spacious sleeping houses, offering super soft and warm lounging spots for your feline friends, ensuring a luxurious napping experience.
- **Leakproof Roof:** A waterproof asphalt roof is designed to prevent leaks, protecting your pets from sun and rain. The strong metal wire construction ensures your cat can safely enjoy the outdoors.

- **Easy Assembly:** The sturdy cat tree is reinforced with wooden corner strips for enhanced durability. Pre-drilled screw holes and numbered parts facilitate straightforward setup.
- **Expandable Design:** The design allows for expansion by combining multiple catio units, enabling various configurations such as left-to-right, front-to-back, or L-shaped setups for increased space.

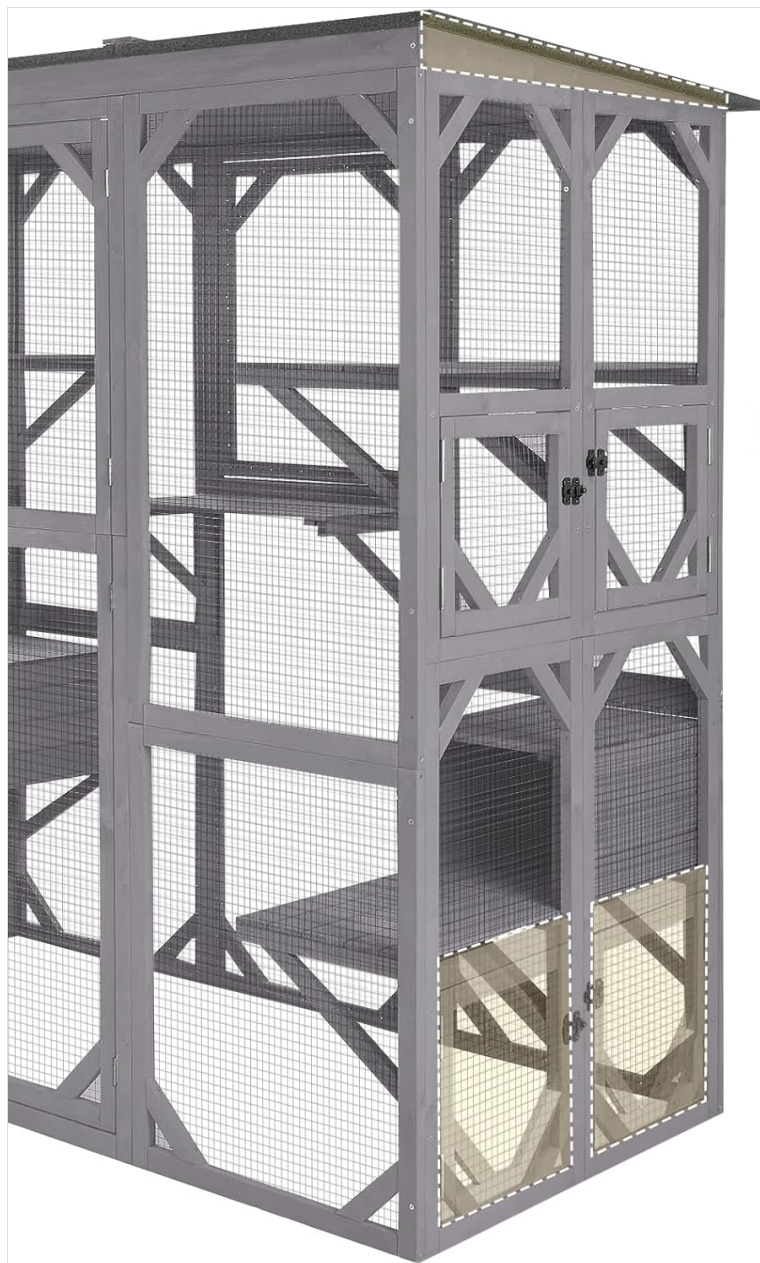

## Spacious Living Area

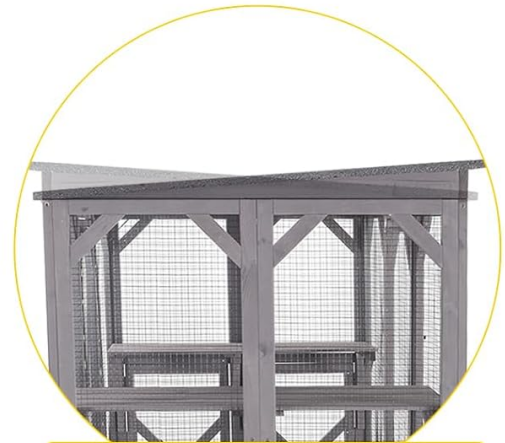

- Enough for 2-6 cats
- 7 platform & 2 small house included

### 3. SETUP AND ASSEMBLY

Assembly of the Aivituvn Catio requires careful attention to detail. While designed for ease of setup with pre-drilled holes and numbered parts, it is recommended that **two people** participate in the assembly process. Allow approximately 2 to 4 hours for complete setup.

#### 3.1. Preparation

1. Unpack all components and verify against the parts list provided in your physical manual.
2. Lay out all pieces in separate piles according to their corresponding sections to streamline the assembly process.
3. Ensure you have the necessary tools, including a screwdriver (preferably a good quality electric one) and outdoor wood glue for optional reinforcement.
4. Choose a level and stable location for the catio.

### 3.2. Assembly Steps

Follow the step-by-step instructions provided in the included physical assembly manual. Pay close attention to the orientation of each piece. The wood material is soft; therefore, use caution when tightening screws, especially with power tools, to prevent cracking. The structure gains significant sturdiness once all sides are fastened, screws are tightened, and shelves and brackets are in place, particularly after the roof is installed.

Image 3.1: The large walk-in door (67 inches high) provides easy access for cleaning and interaction.

### 3.3. Connecting to a Window or Pet Door

The catio is designed to allow for integration with your home, providing your pets with seamless access. You can remove sections of the wire mesh to connect the catio to a window or a dedicated pet door. This feature enhances the freedom of movement for your cats between your home and their outdoor enclosure.

## Give your Pet the Freedom to Come and Go

Take Off Wire Mesh Connect The Cage To The Window/Pet Door

## 4. OPERATING INSTRUCTIONS

Once assembled, the Aivitvin Catio provides a safe and engaging space for your cats. Encourage your cats to explore the various platforms and utilize the sleeping houses for rest. The large walk-in door allows for easy entry and exit for humans, facilitating interaction and maintenance.

### 4.1. Daily Use

- Ensure the main door and any smaller access doors are securely latched when cats are inside to prevent escape.
- Provide fresh water and food bowls within the catio if your cats will be spending extended periods outdoors.
- Introduce toys and scratching posts to enhance their outdoor experience.

### 4.2. Expanding Your Catio

For additional space, you can purchase and combine multiple Aivitvin catio units. This modular design allows

for flexible expansion to create larger or uniquely shaped enclosures, such as an L-shape, providing even more room for your pets to roam.

## AIVITUVIN COMBINATION SERIES

## 5. MAINTENANCE

Regular maintenance will prolong the life and appearance of your Aivituvin Catio.

### 5.1. Cleaning

- Periodically clean the platforms and interior surfaces with a pet-safe cleaner.
- Remove any debris, leaves, or accumulated dirt from the roof and interior.

### 5.2. Wood and Roof Care

- While the roof is waterproof, consider applying an additional sealant (e.g., Flex Seal or an outdoor waterproof spray paint) to the wooden components and roof for enhanced weather protection and

longevity, especially in wet climates.

- Inspect the wood for any signs of wear, cracking, or rot. Address minor issues promptly with wood glue or appropriate wood repair products.

### 5.3. Hardware Inspection

- Regularly check all screws, latches, and hinges to ensure they are secure. Tighten any loose fasteners.
- Ensure the metal wire mesh remains intact and free from damage to maintain security.

## 6. TROUBLESHOOTING

Here are some common observations and solutions:

Issue	Possible Cause	Solution
Catio feels flimsy during assembly.	This is normal until all components, especially the roof, are fully installed and tightened.	Continue with assembly, ensuring all screws are tightened. The structure will become sturdy upon completion.
Water leakage from the roof or joints.	Inadequate sealing or wear over time.	Apply an additional waterproof sealant (e.g., Flex Seal) to the roof seams and wooden joints. Ensure proper roof installation with a slight slant for runoff.
Wood cracking during assembly.	Over-tightening screws, especially with power tools, on soft wood.	Use caution and lower torque settings on power drills. Apply outdoor wood glue to minor cracks for repair.
Side ledges feel unstable.	May require additional reinforcement.	Consider adding zip ties around brackets or mending plates to strengthen connections.

## 7. SPECIFICATIONS

- **Product Dimensions (L x W x H):** 71 x 38 x 71 inches
- **Item Weight:** 124 Pounds
- **Material:** Wood
- **Color:** Grey
- **Target Audience:** Cats (Large, Medium, Small breeds)
- **Specific Uses:** Outdoor
- **Included Components:** Platforms, Sleeping Houses
