Setup

Carefully remove all components from the packaging. Ensure all accessories and Build-A-Ghost parts are accounted for before discarding packaging materials.

Attaching Proton Pack and Plasma Stream

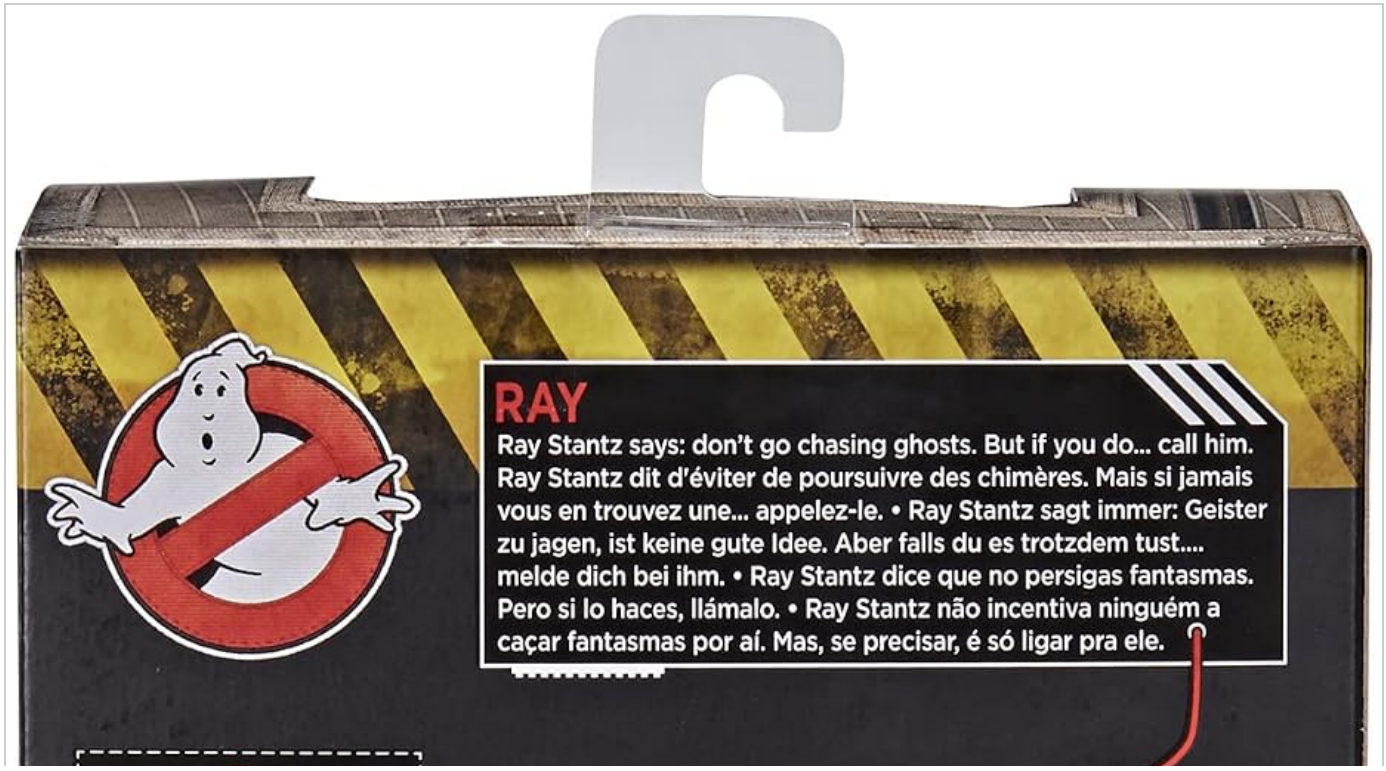

The Ray Stantz figure comes with a proton pack, neutrona wand, and a flexible plasma stream effect. The proton pack is designed to fit securely on the figure's back. The neutrona wand connects to the proton pack via a flexible hose. The plasma stream effect can be attached to the end of the neutrona wand to simulate firing. The plasma stream is designed with a harder orange core and flexible blue surrounding elements for dynamic posing.

Maintenance

To ensure the longevity of your action figure, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to gently wipe away dust. For stubborn dirt, a slightly damp cloth with mild soap can be used, but avoid harsh chemicals or abrasive materials.
- **Storage:** Store the figure away from direct sunlight, extreme temperatures, and high humidity to prevent discoloration or material degradation. Keep accessories in a safe place to avoid loss.
- **Handling:** Handle the figure by its main body parts. Avoid excessive force on joints or small accessories to prevent breakage.

Troubleshooting

If you encounter any issues with your figure, consider the following:

- **Stiff Joints:** If a joint is stiff, gently warm the area with a hairdryer on a low setting for a few seconds to loosen the plastic before attempting to move it.
- **Loose Joints:** For excessively loose joints, a small amount of clear nail polish or a specialized joint tightener can be applied to the joint and allowed to dry.
- **Lost Accessories:** Keep all small accessories in a designated container when not in use to prevent loss. Replacement parts may not be readily available.
