# Instruction Manual

Shad Top Master Fitting Kit for Super SOCO CPX Electric '20

Model: S0CP10ST

## 1. PRODUCT OVERVIEW

The Shad Top Master fitting is a specialized kit designed to enable the secure mounting of a top case onto the Super SOCO CPX Electric '20 motorcycle. This fitting is engineered specifically for this motorcycle model, ensuring optimal integration and performance. It provides a stable and reliable base for your top case, enhancing the motorcycle's utility for carrying luggage.

Key features of this fitting include:

- 100% designed and manufactured in Barcelona, ensuring high-quality craftsmanship.
- Specifically engineered fittings for mounting a Shad top case on the Super SOCO CPX Electric '20 motorcycle.
- Durable powder-coated metallic paint finish for enhanced longevity and aesthetics.

Figure 1: Super SOCO CPX Electric '20 motorcycle with the Shad Top Master fitting and a compatible top case installed. This image illustrates the final appearance of the product when fully assembled and in use.

## 2. COMPONENTS AND COMPATIBILITY

This product includes the necessary metallic fittings to attach a top case to your motorcycle. To complete the installation and mount a top case, you will also require a mounting plate, which is typically included with Shad top cases (with the exception of TR48/TR37 models).

The Shad Top Master fitting is compatible with the following Shad mounting plates:

- Small mounting plate (D1B29PA)
- Medium mounting plate (D1B40PA)
- Big mounting plate (D1B591PA)

**Important Note: This top fitting is NOT compatible with aluminum mounting plates.**

## 3. INSTALLATION GUIDE

Follow these instructions carefully to ensure proper and secure installation of the Shad Top Master fitting kit on your Super SOCO CPX Electric '20 motorcycle. It is recommended to have basic mechanical tools available.

### 3.1. Preparation

1. Ensure the motorcycle is stable and turned off.
2. Identify the designated mounting points on the rear of your Super SOCO CPX Electric '20. Refer to your motorcycle's owner's manual if necessary.
3. Unpack all components of the Shad Top Master fitting kit and verify all parts are present according to the included parts list (not provided in this manual, refer to product packaging).

Figure 2: Super SOCO CPX Electric '20 motorcycle without the Shad Top Master fitting installed. This image shows the motorcycle's rear section where the fitting will be mounted.

### 3.2. Mounting the Fitting

1. Align the Shad Top Master metallic brackets with the pre-drilled holes on the motorcycle's rear frame or luggage rack area.
2. Secure the brackets using the provided fasteners. Do not fully tighten bolts until all components are loosely in place.
3. Once all brackets are aligned and loosely fastened, progressively tighten all bolts evenly to ensure a secure and stable fit. Refer to the torque specifications if provided with the kit.
4. Verify that the fitting is firmly attached and does not wobble.

### 3.3. Attaching the Top Case Plate

After the Top Master fitting is securely installed, you can attach your compatible Shad mounting plate (D1B29PA, D1B40PA, or D1B591PA) to the fitting. The plate typically slides onto or bolts directly to the Top Master fitting. Follow the instructions provided with your specific Shad top case and mounting plate for this step.

## 4. OPERATING THE TOP CASE SYSTEM

Once the Shad Top Master fitting and the compatible mounting plate are installed, you can attach and detach your Shad top case. Most Shad top cases feature a quick-release mechanism.

- **Attaching the Top Case:** Align the top case with the mounting plate and press down firmly until you hear a click, indicating it is securely locked. Always double-check that the case is firmly attached before riding.
- **Detaching the Top Case:** Use the key to unlock the top case from the plate. Typically, there is a lever or button that, when pressed, allows the case to be lifted off the plate.

Ensure the top case is properly closed and locked before each ride to prevent accidental opening or loss of contents.

## 5. MAINTENANCE

Regular maintenance of your Shad Top Master fitting will ensure its longevity and continued safe operation.

- Cleaning:** Clean the fitting regularly with a damp cloth and mild soap. Avoid abrasive cleaners or solvents that could damage the powder-coated finish.
- Inspection:** Periodically inspect all bolts and fasteners for tightness. Vibrations from riding can sometimes loosen connections. Re-tighten any loose fasteners to the appropriate torque.
- Damage Check:** Check the metallic components for any signs of corrosion, cracks, or deformation. If any damage is observed, discontinue use and contact Shad support for replacement parts or advice.

## 6. TROUBLESHOOTING

This section addresses common issues you might encounter with your Shad Top Master fitting.

Problem	Possible Cause	Solution
Fitting feels loose or wobbly after installation.	Bolts are not sufficiently tightened.	Re-tighten all mounting bolts securely. Ensure even tightening.
Top case does not attach securely to the plate.	Incorrect plate type; obstruction; damaged plate/case mechanism.	Verify you are using a compatible Shad mounting plate (D1B29PA, D1B40PA, D1B591PA). Check for debris or damage on the plate or case locking mechanism. Ensure the fitting is correctly installed.
Top case cannot be detached.	Locking mechanism jammed; key issue.	Ensure the key is fully inserted and turned. Apply gentle pressure while operating the release mechanism. Do not force it.

## 7. SPECIFICATIONS

Attribute	Detail
Brand	Shad
Model Number	S0CP10ST
Material	Aluminum
Exterior Finish	Aluminum (Powder Coated Metallic Paint)
Color	Other
Vehicle Service Type	Motorcycle (Super SOCO CPX Electric '20)
Item Weight	1.28 Kilograms (approx. 2.82 pounds)
Manufacturer	SHAD

Attribute	Detail
GTIN (Global Trade Identification Number)	08430358671881
Date First Available	November 6, 2020

## 8. WARRANTY AND SUPPORT
