SAMOTECH SM215-TRD

SAMOTECH SM215-TRD Wireless Dimmer and Shortcut Button Switch Cover User Manual

1. INTRODUCTION

The SAMOTECH SM215-TRD switch cover is designed to address a common challenge in smart homes: preventing accidental deactivation of smart lights by the physical wall switch. This cover ensures your smart lighting system remains powered and functional 24/7, while still allowing access to the underlying physical switch when necessary. Its installation is straightforward and does not require any electrical modifications.

2. PRODUCT FEATURES

- Universal smart cover design with unique functionalities.
- Covers existing light switches to facilitate the installation of TRÅDFRI wireless dimmers and shortcut buttons.
- Prevents accidental power-off, ensuring smart lights remain active and functional around the clock.
- Intelligent design and broad compatibility simplify the installation process.
- Elegant and unique aesthetic that integrates seamlessly into various home environments.

3. PACKAGE CONTENTS

The package typically includes:

- 1 x SAMOTECH SM215-TRD Switch Cover
- Mounting screws (longer than standard)
- Washers for spacing adjustment
- Small screwdriver (may be included)

4. COMPATIBILITY

This cover is specifically designed for compatibility with:

- IKEA TRÅDFRI Wireless Dimmer
- IKEA TRÅDFRI Wireless Shortcut Button

5. SETUP AND INSTALLATION

Follow these steps for easy installation:

- 1. Prepare the Existing Switch:** Carefully unscrew the two fixing screws on your existing wall light switch plate.
- 2. Position the Cover:** Place the SAMOTECH SM215-TRD cover over the existing switch plate. Ensure it aligns correctly.
- 3. Secure the Cover:** Using the longer screws provided in the package, screw the cover and the existing switch plate into the wall. Use the included washers if necessary to achieve a flush fit and prevent bending of the interior mechanism.

4. **Attach Smart Button/Dimmer:** Insert your compatible IKEA TRÅDFRI smart button or dimmer into the designated slot on the cover. The cover features a built-in magnetic plate to securely hold the smart device in place.

6. OPERATION

Once installed, the SAMOTECH SM215-TRD cover allows you to use your TRÅDFRI wireless dimmer or shortcut button while protecting the physical switch. The cover is designed with a sliding mechanism that allows you to reveal the underlying physical switch for emergency use or for initial pairing processes, without needing to remove the entire cover.

7. MAINTENANCE

The SAMOTECH SM215-TRD switch cover is made from durable ABS plastic and requires minimal maintenance.

- **Cleaning:** Wipe the surface with a soft, damp cloth. Avoid using abrasive cleaners or solvents, as these can damage the finish.
- **Inspection:** Periodically check that the cover remains securely fastened to the wall.

8. TROUBLESHOOTING

- **Cover not flush with wall:** Ensure the provided washers are used correctly to fill any gaps between the existing switch plate and the wall, allowing the cover to sit flat.
- **Smart button not staying in place:** Verify that your smart button has its magnetic backing intact and that it is correctly aligned with the magnetic plate within the cover.
- **Difficulty accessing the physical switch:** If the sliding mechanism feels stiff, ensure no debris is obstructing its movement. If the cover was overtightened during installation, it might slightly deform; loosening the screws slightly and readjusting with washers can help.

9. SPECIFICATIONS

Attribute	Value
Brand	SAMOTECH
Item Model Number	SM215-TRD
Product Dimensions (L x W x H)	10.5 x 9.5 x 2.2 cm
Weight	70 grams
Material	ABS Plastic
Contact Material	ABS Plastic
Mounting Type	Wall Mount
International Protection Rating	IP00
Manufacturer	SAMOTECH
