SETUP

1. **Connect to Power Adapter:** Use the provided USB-C to USB-C charging cable to connect the NANAMI Magnetic Wireless Charger to a compatible USB-C power adapter (not included). If your power adapter has a USB-A port, use the included USB-C female to USB-A male adapter. For optimal fast charging, a Power Delivery (PD) or Quick Charge (QC) wall charger is recommended.
2. **Placement:** Place the charger on a flat, stable surface, or attach it directly to the back of your compatible iPhone.

OPERATING INSTRUCTIONS

1. **Initiate Charging:** Place your compatible device (iPhone 12/13 series or AirPods Pro) onto the center of the NANAMI Magnetic Wireless Charger. For iPhone 12/13 series, the magnetic function will automatically align your device for optimal charging.
2. **Verify Charging:** Your device's screen will indicate that charging has begun.
3. **Case Compatibility:** The charger is designed to work with thin cases and MagSafe-compatible cases. It may not function correctly or provide optimal magnetic hold with metal cases, cases with grips/stands, or thick wallets.

MAINTENANCE

- Keep the charger clean and dry. Use a soft, dry cloth to wipe the surface.
- Avoid exposing the charger to extreme temperatures, direct sunlight, or humid environments.
- Do not attempt to disassemble or modify the charger. This will void the warranty and may cause damage or injury.
- Store the charger in a cool, dry place when not in use.

TROUBLESHOOTING

Device not charging:

- Ensure the charger is properly connected to a working power adapter and outlet.
- Verify that your device is correctly centered on the charging pad.
- Remove any thick cases, metal attachments, or magnetic strips from your device.
- Confirm your device is compatible with wireless charging.

Slow charging:

- Use a Power Delivery (PD) or Quick Charge (QC) compatible wall adapter for optimal charging speed.
- Ensure your device is properly aligned on the charging pad.
- Avoid charging in excessively warm environments, as this can trigger thermal protection and reduce charging speed.

Charger or device gets warm during charging:

- It is normal for wireless chargers and devices to become slightly warm during charging. The NANAMI charger is designed with advanced heat dissipation.
- If the device or charger becomes excessively hot, discontinue use and check for obstructions or improper alignment.
