## SETUP

---

### Inserting SIM and microSD Cards

Before powering on your device, you will need to insert your SIM card(s) and an optional microSD card for expanded storage. The HTC U20 5G supports dual SIM functionality.

1. Locate the SIM card tray on the side of your phone.
2. Insert the SIM ejector tool into the small hole on the tray and push gently until the tray pops out.
3. Place your Nano SIM card(s) into the designated slots on the tray with the gold contacts facing down. If using a microSD card, place it in its dedicated slot.

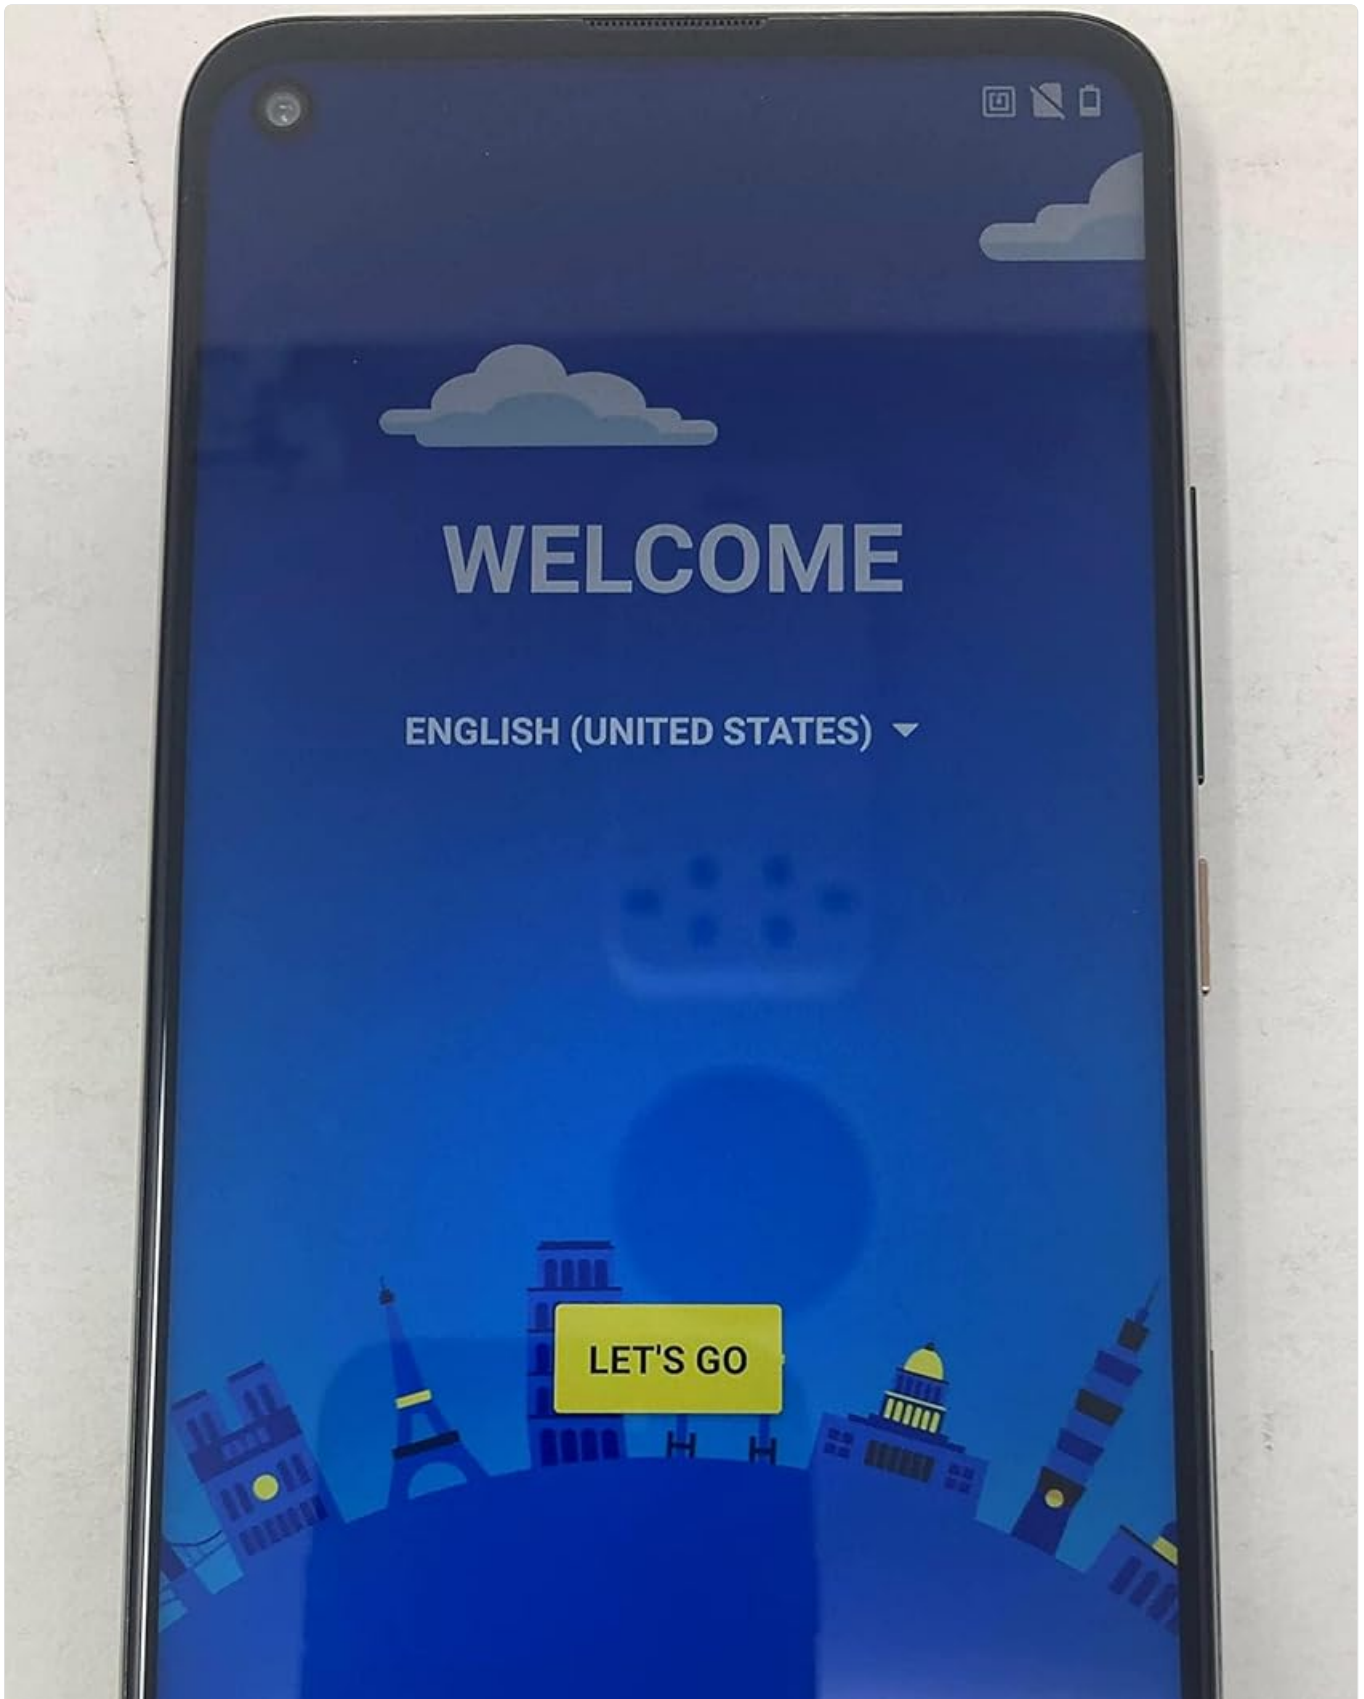

4. Carefully push the tray back into the phone until it clicks into place.

*Note: Ensure the phone is powered off before inserting or removing SIM or microSD cards to prevent data corruption.*

## Initial Power On and Setup

To power on your HTC U20 5G for the first time:

1. Press and hold the Power button (located on the right side of the phone) until the HTC logo appears.
2. The phone will boot up and display a welcome screen.

## MAINTENANCE AND CARE

To ensure the longevity and optimal performance of your HTC U20 5G, follow these maintenance guidelines:

- **Cleaning:** Use a soft, lint-free cloth to clean the screen and body of the phone. Avoid abrasive materials or harsh chemicals.
- **Battery Care:** Avoid extreme temperatures. Do not let the battery completely drain frequently, and avoid overcharging for extended periods.
- **Software Updates:** Regularly check for and install system updates to ensure your device has the latest security patches and performance improvements.
- **Protection:** Consider using a protective case and screen protector to guard against drops and scratches.
- **Storage:** Keep the device away from excessive moisture, dust, and direct sunlight.

## TROUBLESHOOTING

If you encounter issues with your HTC U20 5G, try the following common troubleshooting steps:

- **Device Not Responding:** Press and hold the Power button for about 10-15 seconds to force a restart.

- **Network Issues:** Check if your SIM card is properly inserted. Try toggling Airplane Mode on and off. Verify your mobile data settings with your carrier.
- **Battery Draining Quickly:** Close unused apps running in the background. Reduce screen brightness. Disable unnecessary features like GPS or Bluetooth when not in use.
- **App Crashes:** Clear the cache and data for the problematic app in Settings > Apps. If the issue persists, uninstall and reinstall the app.
- **Storage Full:** Delete unnecessary files, photos, and videos. Uninstall unused apps. Consider moving media to a microSD card.

For more complex issues, refer to the HTC support website or contact customer service.
