MAINTENANCE AND CARE

Cleaning the Cultured Marble Countertop

The white cultured marble countertop offers an effortlessly cleanable surface. For routine cleaning, use a soft cloth with mild soap and water. Avoid abrasive cleaners, harsh chemicals, or acidic substances, as these can damage the finish and surface of the cultured marble.

Cabinet and Hardware Care

Wipe the cabinet surfaces with a soft, damp cloth. Avoid excessive moisture. For the hardware (Brushed Nickel and Black finishes), use a dry or slightly damp cloth. Do not use abrasive cleaners or polishes that could scratch or dull the finish.

TROUBLESHOOTING

Uneven Vanity

If the vanity appears uneven or wobbly, adjust the hidden leveling feet located at the base of the unit. Turn them clockwise to raise and counter-clockwise to lower until the vanity is stable and level.

Drawers or Doors Not Closing Smoothly

Check for any obstructions within the drawer slides or door hinges. Ensure that the soft-closing mechanisms are free from debris. If issues persist, inspect the hinges and slides for proper alignment and tightness.

Power Outlets Not Working

Verify that the vanity is properly connected to a power source. Check the circuit breaker in your home. If the issue continues, consult a qualified electrician.
