1. Important Safety Information

Please read and understand all instructions before installing and using this product. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- **Indoor/Outdoor Use:** This rope light is rated for both indoor and outdoor use. Ensure all connections are secure and protected from moisture when used outdoors.
- **Electrical Safety:** Always unplug the rope light from the power outlet before installation, maintenance, or when not in use. Do not operate with a damaged cord or plug.
- **Overloading:** Do not exceed the maximum linkable length of 150 feet (three sets). Overloading can cause overheating and fire.
- **Mounting:** Use only the provided mounting clips and screws. Do not use staples, nails, or other materials that could damage the rope light casing or wiring.
- **Handling:** Do not bend the rope light sharply or twist it excessively, as this can damage the internal wiring. Avoid placing heavy objects on the rope light.
- **Temperature:** Do not operate the rope light in temperatures outside its specified operating range.
- **Children:** Keep out of reach of children. This is not a toy.

2. What's in the Box

Carefully unpack the contents and ensure all items are present:

- LED Rope Light with Power Cord
- Mounting Clips
- Mounting Screws

3. Setup and Installation

Follow these steps for safe and effective installation of your UltraPro LED Rope Lights.

3.1 Planning Your Installation

- Determine the desired path for your rope light. The flexible design allows for wrapping around trees, lining walkways, mounting on decks, balconies, or installing above cabinets and along headboards.
- Ensure the power cord can reach a suitable electrical outlet without being stretched or creating a tripping hazard.
- Space mounting clips evenly along the planned path to provide secure support for the rope light.

3.2 Mounting the Rope Light

1. **Secure Mounting Clips:** Place mounting clips at desired intervals (e.g., every 1-2 feet) along your planned path. Use the provided screws to securely fasten each clip to the surface.
2. **Insert Rope Light:** Gently press the rope light into the secured mounting clips. Ensure the rope light is fully seated within each clip.
3. **Connect to Power:** Once the rope light is fully mounted, plug the power cord into a standard 120V AC outlet.

4. Operating Instructions

Operating your UltraPro LED Rope Lights is straightforward:

- **Power On/Off:** Plug the rope light into a standard 120V AC outlet to turn it on. Unplug it from the outlet to turn it off.
- **Usage:** Enjoy the warm white 3000K glow for ambient and accent lighting in your desired indoor or outdoor space.

5. Linking Multiple Sets

You can connect up to three UltraPro rope light sets for a maximum total length of 150 feet.

1. **Ensure Power is Off:** Always unplug all rope light sets from the power source before attempting to link them.
2. **Align Connectors:** Locate the male connector on one rope light set and the female connector on another. Align them carefully.
3. **Secure Connection:** Push the connectors firmly together until they are fully seated. Twist the threaded collar (if present) to secure the connection and ensure it is watertight for outdoor use.
4. **Test:** Once linked, plug the first rope light set into the power outlet to test the connection.

6. Maintenance

Proper maintenance ensures the longevity and performance of your rope lights:

- **Cleaning:** Disconnect from power. Wipe the rope light with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.
- **Inspection:** Periodically inspect the rope light, power cord, and plug for any signs of damage, fraying, or loose connections. If damage is found, discontinue use and replace the product.
- **Storage:** When not in use for extended periods, unplug the rope light and store it in a cool, dry place, away from direct sunlight and extreme temperatures. Coil it loosely to prevent kinking.

7. Troubleshooting

If you encounter issues with your UltraPro LED Rope Lights, try the following solutions:

Problem	Possible Cause	Solution
Rope light does not illuminate	No power; loose connection; faulty outlet	Check if the plug is fully inserted. Test the outlet with another device. Ensure all linked sections are securely connected.
Part of the rope light is not lit	Internal damage; loose connection between linked sections	Inspect the unlit section for visible damage. If linking multiple sets, ensure the connection point is secure. If damage is suspected, discontinue use.
Rope light flickers	Loose connection; power fluctuation	Ensure all connections are tight. Try plugging into a different outlet.

8. Specifications

Feature	Detail
Model Number	54503
Length	16 Feet (192 inches)
Light Color	Warm White
